Assemblages Of Health Deleuzes Empiricism And The Ethology Of Life:

Assemblages of Health Cameron Duff, 2014-05-13 This book presents a review of Deleuze's key methods and concepts in the course of exploring how these methods may be applied in contemporary studies of health and illness. Taken from a Deleuzian perspective, health and wellbeing will be characterized as a discontinuous process of affective and relational transitions. The book argues that health conceived in terms of the quality of life is advanced or facilitated in the provision of new affective sensitivities and new relational capacities. Following an assessment of Deleuze's key ideas, the book will offer a series of case studies designed to illustrate how Deleuze's ideas can be applied to select health problems. This analysis draws out the specific advantages of a Deleuzian approach to public health research, establishing grounds for more widespread engagement with Deleuze's ideas across the health and social sciences.

Social Theory and Health Education Deana Leahy, Katie Fitzpatrick, Jan Wright, 2020-03-27 Social Theory and Health Education brings together health education scholarship with a diverse range of social theories to demonstrate the value and impact of their application to associated health and education contexts. For the first time, this book draws together cutting-edge research that demonstrates the productive and impactful ways social theory can be applied to the diversity of research in this field. Topics covered include digital health, health education in sexuality, gender, and health, food and nutrition, mental health and wellbeing, environment, and alcohol and drug use. In exploring these topics, each author utilises different theorists and concepts to compellingly demonstrate their application to a range of health education research contexts. This collection provides examples for both students, early career, and established scholars that showcase ways that social theory can be utilised in empirical and theoretical research. The collection also highlights how health education scholarship can be enhanced by engaging with social theory. It also explores the viability of various theories for work in this field and their potential to generate new approaches for research.

Recovering Assemblages Aysel Sultan, 2022-08-30 Drawing together insights and provocations from diverse fields of inquiry, this important new book asks probing questions about the lived experience of substance use and misuse, health and recovery. What if we were to approach these experiences in terms of spaces and events, affects and relations, rather than subjects and their settled identities? In charting this course, the book offers a powerful new social logic of health, wellbeing, and recovery. Cameron Duff, Associate Professor, RMIT University. This is an important book which expands and deepens our understanding of recovery. It presents recovery as something made in practice, taking multiple forms in specific contexts. Drawing on qualitative research with young people in Azerbaijan and Germany, Sultan takes the concept of recovery beyond its more familiar and normative iterations and instead introduces the reader to a fascinating field of dynamic and unruly relations. Helen Keane, Professor in Research School of Social Sciences, Australian National University. *Recovering Assemblages* offers an exciting new insight into the policies and practices of recovery and drug use, bridging critical drug studies and the sociology of health and illness. The book investigates lived experiences of young people in Azerbaijan and

Germany during their personal recovery from alcohol and other drug use and shows the contingency of real experiences The sociomaterial and ontological analyses unfold the interrelation of practices spaces bodies and affects in experiencing recovery both within and outside of various treatment facilities The book will appeal to a range of scholars postgraduates and undergraduates engaged in critical methodological and empirical studies of recovery drug use and policy **Assemblages of cancer** Cinzia Greco,2025-03-11 Assemblages of cancer illustrates the tensions in the experiences and context of breast cancer in Western Europe Breast cancer is presented as a success story in oncology especially in countries with advanced universal healthcare systems At the same time individual experiences are shaped by uncertainty local variability of healthcare provisions and the need for patients to assemble information about the treatments knowledge on healthcare systems navigation and different processes of meaning making to manage the uncertainty and variability characterising individual outcomes The book explores both how individual bodies and experiences are transformed by different local medical practices institutions and discourses of breast cancer and how patients need to find their own way in these contexts Assemblages of Cancer is based on ten years of ethnographic work with patients and medical professionals in the UK France and Italy **Dynamic Relationality Theory of Creative Transformation** Kerimcan Ozcan,Venkat

Diagnosing Postcolonial Literature Don

Johnston,2021-02-11 Diagnosing Postcolonial Literature is a fresh and needed intervention into the study of postcolonial literature and the postcolonial condition Deleuze s notion that literature is an enterprise of health and that great authors consequently are diagnosticians of their culture can be applied to postcolonial literature The methodology however goes beyond the Deleuzian approach and offers a rich synthesis of Deleuze and Guattari with a range of different frameworks including health and human rights issues the capabilities approach of Sen and Nussbaum and the quantitative formalism of Moretti This book majorly seeks to combine the study of postcolonial literature a field in which Deleuze and Guattari are often used with social sciences and quantitative methods The work is genuinely interdisciplinary and breaks new ground both for the study of postcolonial literature and applications of Deleuze and Guattari It does this while maintaining a focus on health broadly conceived in as an assemblage in Deleuzian fashion

Emotion in the Digital Age Darren Ellis,Ian

Tucker,2020-10-08 Emotion in the Digital Age examines how emotion is understood researched and experienced in relation to practices of digitisation and datafication said to constitute a digital age The overarching concern of the book is with how emotion operates in through and with digital technologies The digital landscape is vast and as such the authors focus on four key areas of digital practice artificial intelligence social media mental health and surveillance Interrogating each area shows how emotion is commodified symbolised shared and experienced and as such operates in multiple dimensions This includes tracing the emotional impact of early mass media e g cinema through to efforts to programme AI agents with skills in emotional communication e g mental health chatbots This timely study offers theoretical empirical and practical insight regarding the ways that digitisation is changing knowledge and experience of emotion and affective life Crucially this involves both the multiple versions of digital technologies designed to engage with emotion e g emotional AI through to the broader emotional impact of living in digitally saturated environments The authors argue that this constitutes a psycho social way of being in which digital technologies and emotion operate as key dimensions of the ways we simultaneously relate to ourselves as individual subjects and to others as part of collectives As such Emotion in the Digital Age will prove important reading for students and researchers in emotion studies psychology science and technology studies sociology and related fields
