Victoria L. Dunckley, MD, 2015-06-23 Increasing numbers of parents grapple with children who are acting out without obvious reason Revved up and irritable many of these children are diagnosed with ADHD bipolar illness autism or other disorders but don't respond well to treatment They are then medicated often with poor results and unwanted side effects Based on emerging scientific research and extensive clinical experience integrative child psychiatrist Dr Victoria Dunckley has pioneered a four week program to treat the frequent underlying cause Electronic Screen Syndrome ESS Dr Dunckley has found that everyday use of interactive screen devices such as computers video games smartphones and tablets can easily overstimulate a child's nervous system triggering a variety of stubborn symptoms In contrast she's discovered that a strict extended electronic fast single handedly improves mood focus sleep and behavior regardless of the child's diagnosis It also reduces the need for medication and renders other treatments more effective Offered now in this book this simple intervention can produce a life changing shift in brain function and help your child get back on track all without cost or medication While no one in today's connected world can completely shun electronic stimuli Dr Dunckley provides hope for parents who feel that their child has been misdiagnosed or inappropriately medicated by presenting an alternative explanation for their child's difficulties and a concrete plan for treating them **Methods of Measuring Environmental**
