Asphaltenes And Asphalts Vol 1 Development In Petroleum Science Vol 4:

Asphaltenes and Asphalts, 2 T.F. Yen, G.V. Chilingarian, 2000-08-16 This is the second volume in the series of Asphaltenes and Asphalts Since the publication of the first volume in 1994 there has been a significant advancement in our knowledge Knowledge of both asphaltenes and asphalts is needed by several disciplines and often the progress is dictated by interdisciplinary sciences and technology This includes material sciences fuel sciences chemical engineering civil engineering environmental engineering polymer sciences transportation engineering petroleum engineering chemistry geological sciences physics geochemistry rheology biological sciences tribology soil sciences petroleum science The development in this field is not based on our knowledge of chemistry or petroleum engineering alone as many chemists and petroleum engineers believe In this volume therefore significant contributions from different disciplines have been included

Characterization and Properties of Petroleum Fractions M. R. Riazi, 2005 The last three chapters of this book deal with application of methods presented in previous chapters to estimate various thermodynamic physical and transport properties of petroleum fractions In this chapter various methods for prediction of physical and thermodynamic properties of pure hydrocarbons and their mixtures petroleum fractions crude oils natural gases and reservoir fluids are presented As it was discussed in Chapters 5 and 6 properties of gases may be estimated more accurately than properties of liquids Theoretical methods of Chapters 5 and 6 for estimation of thermophysical properties generally can be applied to both liquids and gases however more accurate properties can be predicted through empirical correlations particularly developed for liquids When these correlations are developed with some theoretical basis they are more accurate and have wider range of applications In this chapter some of these semitheoretical correlations are presented Methods presented in Chapters 5 and 6 can be used to estimate properties such as density enthalpy heat capacity heat of vaporization and vapor pressure Characterization methods of Chapters 2 4 are used to determine the input parameters needed for various predictive methods One important part of this chapter is prediction of vapor pressure that is needed for vapor liquid equilibrium calculations of Chapter 9 The Greening of Petroleum Operations M. R. Islam, A. B. Chhetri, M. M. Khan, 2011-01-25 The Future of Petroleum Operations This state of the art text analyzes some of the most contentious issues in the energy industry covering new and greener processes for engineers and scientists and urging them to move petroleum operations closer to sustainability Although petroleum is still the world's most diverse efficient and abundant energy source there is a growing initiative from global political and industry leaders to go green because of climate concerns and high gasoline prices This book investigates and details how to do that This groundbreaking new volume Explains why current petroleum industry practices are inherently unsustainable and offers unique new solutions for greening the petroleum industry Discusses hot button issues such as global warming carbon sequestration zero waste management and sustainability Shows engineers and scientists how to implement the processes necessary to be more environmentally conscious Offers for the first time a new theory that certain carbons do not contribute

to global warming but their origin and the processes involved do Praise for *The Greening of Petroleum Operations* The book proposes a paradigm shift in energy management It correctly identifies root causes of environmental impact of current petroleum production operations With proper science the book shows that fossil fuel production and utilization are inherently sustainable as long as natural materials and energy sources are used This book has the potential of revolutionizing energy management practices Farouq Ali Honorary Professor of Oil and Gas Engineering University of Calgary
