Governing the Palm Oil Industry Patrick O'Reilly, Helena Varkkey, 2024-08-23

This book examines how different countries across Southeast Asia and Latin America respond to the emergence and expansion of the lucrative yet controversial palm oil industry, paying attention to how national policy and governance regimes are shaping this global industry. With its historic roots in Southeast Asia, oil palm cultivation continues to expand beyond its historical centres. In Latin America, many countries are now developing their own policies to promote and govern oil palm cultivation. This book provides a unique examination of how different countries strive to strike a balance between developmental and environmental concerns through case studies on Indonesia, Malaysia, the Philippines, Thailand, Colombia, Brazil, Ecuador, Honduras, and Mexico, and an outlook for the industry's prospects in Africa. This book applies an assemblage approach to draw out lessons on the global challenges posed by the industry and how differing national governance regimes and communities might respond to them. Rather than a single global industry, the book unveils a complex arrangement of national and even local palm oil assemblages, indicating that there is more than one way to do palm oil. In doing so, the book contributes to a better understanding of the drivers and processes that shape the governance of the

industry both in different nations and globally This book will be of great interest to students and scholars of the palm oil industry as well as those interested in natural resource governance sustainable agriculture conservation environmental justice and environmental and development policy more broadly
