Australian Army Protocol Manual 2001

Christine Bakker, Mirko Sossai

Australian Army Protocol Manual 2001:

Domestic Deployment of the Armed Forces Michael Head, Scott Mann, 2016-05-13 Until recently internal use of the armed forces has been generally regarded by the public as well as academic commentators as conduct to be expected of a military or autocratic regime not a democratic government There is however growing concern that the war on terror has been used to condition public opinion to accept the internal deployment of the armed forces including for broader industrial and political purposes This book examines the national and international law human rights and civil liberties issues involved in governments calling out troops to deal with civil unrest or terrorism As the introduction of military call out legislation has become an emerging global trend in the opening years of the 21st century there is considerable and growing interest in the constitutional and related problems surrounding the deployment of military forces for domestic purposes Examining the changes underway in six comparable countries the United States Canada Britain Germany Japan and Australia this book provides a review and analysis of this trend including its implications for legal and political rights **The Legal Regime**

Applicable to Private Military and Security Company Personnel in Armed Conflicts Mohamad Ghazi

Janaby, 2016-08-31 This book investigates the modern privatisation of war It specifically focuses on the legal regime regulating private military and security company PMSC personnel in armed conflicts The law regulating PMSC personnel is analysed from two perspectives Firstly can one of the three following legal statuses established by international humanitarian law mercenary combatant or civilian be applied to PMSC personnel Secondly the book employs a context dependent methodology to explore the legal regime regulating PMSC personnel It argues that the legal regime regulating PMSC personnel in armed conflicts depends on who hires them individual states the United Nations non governmental organisations or armed groups This approach represents a departure from previous literature where attention has primarily been paid to the use of PMSCs by states *The Law of Armed Conflict and the Use of Force* Frauke Lachenmann, Rüdiger Wolfrum, 2017 This volume collects articles on the law of armed conflict and the use of force from the Max Planck

Encyclopedia of Public International Law to facilitate easy access to content from the leading reference work in international law *Commentary on the First Geneva Convention* International Committee of the Red Cross, 2016-12-15 The application and interpretation of the four Geneva Conventions of 1949 and their two Additional Protocols of 1977 have developed significantly in the sixty years since the International Committee of the Red Cross ICRC first published its Commentaries on these important humanitarian treaties To promote a better understanding of and respect for this body of law the ICRC commissioned a comprehensive update of its original Commentaries Its preparation was coordinated by Jean Marie Henckaerts ICRC legal adviser and head of the project to update the Commentaries The First Convention is a foundational text of international humanitarian law It contains the essential rules on the protection of the wounded and sick those assigned to their care and the red cross and red crescent emblems This article by article Commentary takes into account

developments in the law and practice to provide up to date interpretations of the Convention The new Commentary has been reviewed by humanitarian law practitioners and academics from around the world It is an essential tool for anyone working or studying within this field **Commentary on the Third Geneva Convention** ,2021-09-09 The application and interpretation of the four Geneva Conventions of 1949 and their two Additional Protocols of 1977 have developed significantly in the seventy years since the International Committee of the Red Cross ICRC first published its Commentaries on these important humanitarian treaties To promote a better understanding of and respect for this body of law the ICRC commissioned a comprehensive update of its original Commentaries of which this is the third volume The Third Convention relative to the treatment of prisoners of war and their protections takes into account developments in the law and practice in the past seven decades to provide up to date interpretations of the Convention The new Commentary has been reviewed by humanitarian law practitioners and academics from around the world This new Commentary will be an essential tool for anyone involved with international humanitarian law **Commentary on the Second Geneva Convention** ,2017-12-21 The application and interpretation of the four Geneva Conventions of 1949 have developed significantly in the sixty years since the International Committee of the Red Cross ICRC first published its Commentaries on these important humanitarian treaties To promote a better understanding of and respect for this body of law the ICRC commissioned a comprehensive update of its original Commentaries of which this is the second volume Its preparation was coordinated by Jean Marie Henckaerts ICRC legal adviser and head of the project to update the Commentaries The Second Convention is a key text of international humanitarian law It contains the essential rules on the protection of the wounded sick and shipwrecked at sea those assigned to their care and the vessels used for their treatment and evacuation This article by article Commentary takes into account developments in the law and practice to provide up to date interpretations of the Convention The new Commentary has been reviewed by humanitarian law practitioners and academics from around the world including naval experts It is an essential tool for anyone working or studying within this field *The Woomera Manual on the International Law of Military Space Operations* ,2024-05-07 Military uses in space are rapidly changing and expanding challenging both states and non governmental agencies in identifying and applying the governing rules In the midst of these challenges states policymakers and practitioners must engage with new real circumstances in space not merely hypothetical threats or problems As a contribution to the understudied but crucial field The Woomera Manual on the International Law of Military Space Activities and Operations is interdisciplinary in nature drawing on space law national security law technology international law and diplomacy Thus The Woomera Manual serves as the first comprehensive examination of the field In it all three phases of military space interactions are analyzed during times of peace tension or crisis and armed conflict with relevance to both the public and private space sectors Utilizing meticulous research and focusing particularly on state practice it explores the interaction of different legal regimes including space law the UN Charter other treaty based regimes

as well as international humanitarian law Through an extensive consultation process with state and NGO representatives from across the globe The Woomera Manual serves as a practical and reliable resource in the emerging field of space law This book is a critical resource for any entity navigating the increasingly consequential subject of space operations by providing an outline for more predictable and peaceful cooperation *Bully Beef & Balderdash* Graham Wilson,2012-03-15 The Australian Imperial Force first raised in 1914 for overseas war service became better known by its initials the AIF There was a distinct character to those who enlisted in the earliest months and who were destined to fight on Gallipoli During the war the AIF took its place among the great armies of the world on some of history's oldest battlefields The Australians would attack at the Dardanelles enter Jerusalem and Damascus defend Amiens and Ypres and swagger through the streets of Cairo Paris and London with their distinctive slouch hats and comparative wealth of six shillings per day However the legend of the AIF is shrouded in myth and mystery Was Beersheba the last great cavalry charge in history Did the AIF storm the red light district of Cairo and burn it to ground while fighting running battles with the military police Was the AIF the only all volunteer army of World War I Graham Wilson's *Bully Beef and Balderdash* shines an unforgiving light on these and other well known myths of the AIF in World War I arguing that these spectacular legends simply serve to diminish the hard won reputation of the AIF as a fighting force Graham Wilson mounts his own campaign to rehabilitate the historical reputation of the force and to demonstrate that misleading and inaccurate embellishment does nothing but hide the true story of Australia's World War I fighting army *Bully Beef and Balderdash* deliberately tilts at some well loved windmills and for those who cherish the mythical story of the AIF this will not be comfortable reading Yet given the extraordinary truth of the AIF's history it is certainly compelling reading **U.S. Military Operations** Geoffrey S. Corn,Rachel E. VanLandingham,Shane R. Reeves,2016 In *U S Military Operations Law Policy and Practice* a distinguished group of military experts comprehensively analyze how the law is applied during military operations on and off the battlefield Subject matter experts offer a unique insiders perspective on how the law is actually implemented in a wide swath of military activities such as how the law of war applies in the context of multi state coalition forces and whether non governmental organizations involved in quasi military operations are subject to the same law The book goes on to consider whether U S Constitutional 4th Amendment protections apply to the military's cyber defense measures how the law guides targeting decisions and whether United Nations mandates constitute binding rules of international humanitarian law Other areas of focus include how the United States interacts with the International Committee of the Red Cross regarding its international legal obligations and how courts should approach civil claims based on war related torts This book also answers questions regarding how the law of armed conflict applies to such extra conflict acts as intercepting pirates and providing humanitarian relief to civilians in occupied territory

Multilevel Regulation of Military and Security Contractors Christine Bakker,Mirko Sossai,2012-02-10 The outsourcing of military and security services is the object of intense legal debate States employ private military and security

companies PMSCs to perform functions previously exercised by regular armed forces and increasingly international organisations NGOs and business corporations do the same to provide security particularly in crisis situations Much of the public attention on PMSCs has been in response to incidents in which PMSC employees have been accused of violating international humanitarian law Therefore initiatives have been launched to introduce uniform international standards amidst what is currently very uneven national regulation This book analyses and discusses the interplay between international European and domestic regulatory measures in the field of PMSCs It presents a comprehensive assessment of the existing domestic legislation in EU Member States and relevant Third States and identifies implications for future international regulation The book also addresses the crucial questions whether and how the EU can potentially play a more active future role in the regulation of PMSCs to ensure compliance with human rights and international humanitarian law
