Bank Soundness And Macroeconomic Policy:

Bank Soundness and Macroeconomic Policy Mr. Carl-Johan Lindgren, Ms. G. G. Garcia, Mr. Matthew I. Saal, 1996-09-16
Banking sector problems have plagued over 130 of the IMF's member countries since 1980. Developing and industrial market economies alike have been affected as have all the economies in transition. This volume by Carl Johan Lindgren, Gillian Garcia and Matthew I. Saal discusses the linkages between macroeconomic policy and bank soundness. It takes a global view of the causes and consequences of banking sector problems and discusses how the banking system can be strengthened nationally and internationally. *Bank Soundness and Macroeconomic Policy* Carl-Johan Lindgren, Matthew I. Trata de como prevenir a crise nos bancos estudando vários casos de bancos que quebraram no mundo. Latin American Macroeconomic Reforms José Antonio González, Vittorio Corbo, Anne O. Krueger, Aaron Tornell, 2010-04-15. Hidden behind a number of economic crises in the mid to late 1990s including Argentina's headline grabbing monetary and political upheaval is the fact that Latin American economies have generally speaking improved dramatically in recent years. Their success has been due in large part to macroeconomic reforms and this book brings together prominent economists and policymakers to assess a decade of such policy shifts highlighting both the many success stories and the areas in which further work is needed. Contributors offer both case studies of individual countries and regional overviews covering monetary, financial and fiscal policy. Contributors also work to identify future concerns and erect clear signposts for future reforms. For instance now that inflation rates have been stabilized one suggested second stage monetary reform would be to focus on reducing rates from high to low single digits. Financial sector reforms it is suggested should center on improving regulation and supervision. And contributors argue since fiscal stability has already been achieved in most countries new fiscal reforms need to concentrate on institutionalizing fiscal discipline improving the efficiency and equity of tax collection and modifying institutional arrangements to deal with increasingly decentralized federal systems. The analysis and commentary in this volume authored not only by academic observers but by key Latin American policymakers with decades of firsthand experience will prove important to anyone with an interest in the future of Latin America's continuing economic development and reform. When Megawati Soekarnoputri became the President of Indonesia in July 2001 there were strong expectations But so far
fundamental economic and political reforms have yet to be undertaken The deadly Bali bombings on 12 October 2002
presented a wake up call for the Megawati government Terrorism on an international scale had now hit home Now more than
ever there is greater urgency on the part of the Megawati government to tackle the myriad of political and economic
problems plaguing the country This volume features some of the major issues that faced the Megawati government even
before the devastating Bali attacks The contributors include academics practitioners and activists offering a diversity of
views **Central Banking, Monetary Policies, and the Implications for Transition Economies** Mario I. Blejer,Marko
Skreb,2012-12-06 the adaptation of the institutional settings of monetary policy to deal with an emerging market economy
had to be carried out in the midst of an unprecedented stabilization effort and therefore was particularly urgent and
complicated In many of the transition countries the transformation effort implied not just changes in procedures but the
establishment of a central bank from scratch a process that involved an important effort precisely at a time when the whole
system was in serious turmoil While the process of reforms is not yet completed in all the transition countries an immense
amount of progress has been achieved and many of the transition countries face today monetary and central banking
conditions that are close to those of Western economies In this volume we collect a number of important contributions that
discuss the most burning aspects of the current debates on central banking and monetary policy and draw implications for
the postsocialist transition economies The various papers included in the volume deal with a broad set of related issues which
are highly relevant not just for transition economies but for other emerging markets and for advanced economies as well The
subjects covered in the book are divided into seven major categories Sections II to VIII some of which overlap **Annual
Report of the Executive Directors for the Fiscal Year** International Monetary Fund,1993 *Financial Sector
Surveillance and the IMF* Carlo Gola,Francesco Spadafora,2009-11-01 The global financial crisis has magnified the role of
Financial Sector Surveillance FSS in the Fund s activities This paper surveys the various steps and initiatives through which
the Fund has increasingly deepened its involvement in FSS Overall this process can be characterized by a preliminary stage
and two main phases The preliminary stage dates back to the 1980s and early 1990s and was mainly related to the Fund s
research and technical assistance activities within the process of monetary and financial deregulation embraced by several

member countries The first official phase of the Fund's involvement in FSS started in the aftermath of the Mexican crisis and relates to the international call to include financial sector issues among the core areas of Fund surveillance The second phase focuses on the objectives of bringing the coverage of financial sector issues up to par with the coverage of other traditional core areas of surveillance and of integrating financial analysis into the Fund's analytical macroeconomic framework By urging the Fund to give greater attention to its member countries financial systems the international community's response to the global crisis may mark the beginning of a new phase of FSS

Banking Regulation and World Trade Law Lazaros E. Panourgias, 2006-04-07 Banking Regulation and World Trade Law concerns the legal aspects of the interaction between banking regulation and international trade in financial services The author studies the internal banking market of the European Union the liberalisation of financial services trade in the World Trade Organization the accords of the Basel Committee on Banking Supervision and the European Central Bank The book focuses on the balancing between banking regulation and international trade law It discusses discrimination and proportionality in national banking regulation the allocation of prudential regulation and supervision between home and host country and international financial law making The author questions decentralised nation based banking regulation and supervision as a foundation for a sustainable liberalisation of international trade in financial services The book considers various reforms of the international financial architecture such as the incorporation of the Basel processes and accords into the WTO system and the setting up of new international institutions by building on the Basel Committees or the IMF structures The role of central banking in designing the international financial architecture is also explored the book reviews the ECB's competence over foreign exchange policy and its function as lender of last resort and treats price stability banking soundness and representation as critical concepts The analysis also reveals that the concept of prudential despite its extensive use in banking regulation has not been defined with adequate precision In seeking to delineate the interface between international economic law and banking regulation Dr Panourgias builds on the rich European scholarship on institutional financial issues and the US interdisciplinary approach to world trade law He also entertains the notion of international financial law as a distinct field The book will be of particular interest to those concerned with financial law and international banking
