Architecture And Psychoanalysis Architecture And Psychoanalysis:

Architecture and Psychoanalysis John Shannon Hendrix, 2006 Textbook The Architecture of Psychoanalysis Jane Rendell, 2019 In this thought provoking book Jane Rendell explores how architectural space registers in psychoanalysis She investigates both the inherently spatial vocabulary of psychoanalysis and ideas around the physical setting of the psychoanalytic encounter with reference to Sigmund Freud D W Winnicott and Andre Green Building on the innovative writing methods employed in *Art and Architecture and Site Writing* she also addresses the concept of architecture as social condenser a Russian constructivist notion that connects material space and community relations Tracing this idea's progress from 1920s Moscow to 1950s Britain Rendell shows how interior and exterior meet in both psychoanalysis and architectural practice Illuminating a novel field of interdisciplinary enquiry this book breathes fresh life into notions of social space Publisher **Architecture and the Unconscious** John Shannon Hendrix, Lorens Eyan Holm, 2016-06-17 There are a number of recent texts that draw on psychoanalytic theory as an interpretative approach for understanding architecture or that use the formal and social logics of architecture for understanding the psyche But there remains work to be done in bringing what largely amounts to a series of independent voices into a discourse that is greater than the sum of its parts in the way that say the architect Peter Eisenman was able to do with the architecture of deconstruction or that the historian Manfredo Tafuri was able to do with the Marxist critique of architecture The discourse of the present volume focuses specifically for the first time on the subject of the unconscious in relation to the design perception and understanding of architecture It brings together an international group of contributors who provide informed and varied points of view on the role of the unconscious in architectural design and theory and in doing so expand architectural theory to unexplored areas enriching architecture in relation to the humanities The book explores how architecture engages dreams desires imagination memory and emotions how architecture can appeal to a broader scope of human experience and identity Beginning by examining the historical development of the engagement of the unconscious in architectural discourse and the current and historical theoretical and practical intersections of architecture and psychoanalysis the volume also analyses the city and the urban condition *Lacan + Architecture* John Shannon Hendrix, Francesco Proto, 2024-11-14 This book seeks to revise and revive architectural theory through psychoanalysis as well as to apply psychoanalytic theory to architecture Its authors argue for Lacan's central importance for a comprehensive theory of building and suggest how architectural theory might offer new resources for psychoanalytic theorists They address both the perceived crisis in the contemporary state of architecture and architectural theory and crises in society at large including political and economic fracture and instability and threats to mental health and well being It offers fresh insights to architects architectural educators and practitioners scholars of psychoanalysis and anyone interested in the human condition in relation to the built environment This book has been awarded the 2025 Architectural Theory Book of the Year **The Architecture of Psychoanalysis** Jane Rendell, 2017-03-01

In this thought provoking book Jane Rendell explores how architectural space registers in psychoanalysis She investigates both the inherently spatial vocabulary of psychoanalysis and ideas around the physical setting of the psychoanalytic encounter with reference to Sigmund Freud D W Winnicott and Andre Green Building on the innovative writing methods employed in *Art and Architecture and Site Writing* she also addresses the concept of architecture as social condenser a Russian constructivist notion that connects material space and community relations Tracing this idea s progress from 1920s Moscow to 1950s Britain Rendell shows how interior and exterior meet in both psychoanalysis and architectural practice Illuminating a novel field of interdisciplinary enquiry this book breathes fresh life into notions of social space

Psychoanalysis and Architecture Cosimo Schinaia, 2018-05-08 This book explores how psychoanalysis and architecture can enhance and increase the chances of mental containment while also fostering exchange between inside and outside The way in which psychoanalysts take care of mental suffering and the way in which architects and city planners assess the environment are grounded in a shared concern with the notion of dwelling It is a matter of fact that dwelling exists in a complex context comprised of both biological need and symbolic function Psychoanalysis and architecture can work together in both thinking about and designing not only our homes but also the analyst s consulting rooms and more generally our therapy places However this is possible only if they renounce the current limited and restrictive model of this interaction and propose one more that is more in harmony with the questions and situations that clients themselves pose Form Follows Libido Sylvia Lavin, 2007-09-28 How modern architecture came to embrace the urges and fears of the affective unconscious Eight million Americans a year cool their heels in psychiatric waiting rooms Design can help lower this nervous overhead Richard Neutra 1954 Sylvia Lavin s *Form Follows Libido* argues that by the 1950s some architects felt an urge to steer the cool abstraction of high modernism away from a neutral formalism toward the production of more erotic affective environments Lavin turns to the architecture of Richard Neutra 1892 1970 to explore the genesis of these new mood inducing environments In a series of engaging essays weaving through the designs and writings of this Vienna born California based architect Lavin discovers in Neutra a sustained and poignant psychoanalytic reflection set in the context of a burgeoning psychoanalytic culture in America Lavin shows that Neutra s redirection of modernism constituted not a lyrical regression to sentimentality but a deliberate advance of architectural theory and technique to engage the unconscious mind fueled by the ideas of psychoanalysis that were being rapidly disseminated at the time In Neutra s responses to a vivid range of issues from psychoanalysis proper to the popular psychology of tele evangelical prayer Lavin uncovers a radical reconstitution of the architectural discipline Arguing persuasively that the received historical views of both psychoanalysis and architecture have led to a suppression of their compelling coincidences and unorthodoxies Lavin sets out to unleash midcentury architecture s hidden libido Neither Neutra nor psychoanalysis emerges unscathed from her investigation of how architecture came to be saturated by the intrigues of affect often against its will If Reyner Banham sought to put architecture

on the couch then Lavin through Neutra leaps beyond Banham's ameliorative aim to lure contemporary architecture into the lush and dangerous liaisons of environmental design

Psychoanalysis and Architecture Jerome A. Winer, James William Anderson, Elizabeth Danze, 2005

Dialogues between Psychoanalysis and Architecture Christina Moutsou, 2023-11-28

Dialogues between Psychoanalysis and Architecture explores the multisensory space of therapy real or virtual and how important it is in providing the container for the therapeutic relationship and process. This book is highly original in bringing psychoanalysis and architecture together and highlighting how both disciplines strive to achieve transformation of our psychic space. It brings together contributions that comprise three parts: the first explores the space of the consulting room through the senses to examine issues such as smell and its link with memory and belonging; hearing out the Other; the psychoanalytic couch; the medical therapy room and the so-called sixth sense; secondly, the book questions how the consulting room can represent or be redesigned to reflect the philosophy that underlies the therapy process, foregrounding an architectural point of view; and thirdly, the book attends to the significance of the consulting room as a virtual space as it emerged during the pandemic of COVID-19 and beyond. Architectural psychotherapeutic and interdisciplinary perspectives allow for an important new dimension on the psychological use of space and will appeal to psychoanalysts, psychoanalytic and integrative psychotherapists, art therapists, students of psychotherapy as well as architects and designers.

Freud for Architects John Abell, 2020-11-22

Freud for Architects explains what Freud offers to the understanding of architectural creativity and architectural experience with case examples from early modern architecture to the present. Freud's observations on the human psyche and its influence on culture and social behavior have generated a great deal of discussion since the 19th century. Yet what Freud's key ideas offer to the understanding of architectural creativity and experience has received little direct attention. That is partly because Freud opened the door to a place where conventional research in architecture has little traction: the unconscious. Adding to the difficulties, Freud's collection of work is vast and daunting. Freud for Architects navigates Freud's key ideas and bridges a chasm between architecture and psychoanalytic theory. The book highlights Freud's ideas on the foundational developments of childhood developments on which the adult psyche is based. It explains why and how the developmental stages could influence adult architectural preferences and preoccupations, spatial intuition and beliefs about what is proper and right for architectural design. As such, Freud for Architects will be of great interest to students, practitioners and scholars in a range of disciplines including architecture, psychoanalysis and philosophy.
