Questionnaire Evan Kindley, 2016-07-28 *Object Lessons* is a series of short beautifully designed books about the hidden lives of ordinary things. Questionnaires are everywhere we fill them out at doctors' offices and at job interviews to express ourselves and to advance knowledge, to find love and to kill time. But where did they come from and why have they proliferated? Evan Kindley's *Questionnaire* investigates the history of the form as form from the Victorian confession album to the BuzzFeed quiz. By asking questions about the questions we ask ourselves, Kindley uncovers surprising connections between literature and science, psychology and business, and journalism and surveillance. *Object Lessons* is published in partnership with an essay series in *The Atlantic*.

A World Without "Whom" Emmy J. Favilla, BuzzFeed, 2017-11-14 A provocative and jaunty romp through the dos and don'ts of writing for the internet. NYT the practical, the playful and the politically correct from BuzzFeed copy chief Emmy Favilla. *A World Without Whom* is Eats Shoots Leaves for the internet age and BuzzFeed global copy chief Emmy Favilla is the witty go-to style guru of webspeak. As language evolves faster than ever before, what is the future of correct writing? When Favilla was tasked with creating a style guide for BuzzFeed, she opted for spelling, grammar and punctuation guidelines that would reflect not only the site's lighthearted tone but also how readers actually use language IRL. With wry cleverness and an uncanny intuition for the possibilities of internet age expression, Favilla makes a case for breaking the rules laid out by Strunk and White. *A world without whom* she argues is a world with more room for writing that's clear, timely, pleasurable and politically aware. Featuring priceless emoji strings, sidebars, quizzes and style debates among the most lovable word nerds in the digital media world of which Favilla is queen, *A World Without Whom* is essential for readers and writers of virtually everything: news articles, blog posts, tweets, texts, emails and whatever comes next, so basically everyone.

Journalism in the Age of Virtual Reality John V. Pavlik, 2019-09-17 With the advent of the internet and handheld or wearable media systems that plunge the user into 360° video, augmented or virtual reality technology is changing how stories are told and created. In this book, John V. Pavlik argues that a new form of mediated communication has emerged: experiential news. Experiential media delivers not just news stories but also news experiences in which the consumer engages news as a participant or virtual eyewitness in immersive, multisensory and interactive narratives. Pavlik describes and analyzes new tools and approaches that allow journalists to tell stories that go beyond text and image. He delves into developing forms such as virtual reality, haptic technologies, interactive documentaries and drone media, presenting the principles of how to design and frame a story using these techniques. Pavlik warns that although experiential news can heighten user engagement and increase understanding, it may also fuel the transformation of fake news into artificial realities, and he discusses the standards of ethics and accuracy needed to build public trust in journalism in the age of virtual reality. *Journalism in the Age of Virtual Reality* offers important lessons for practitioners seeking to produce quality experiential news and those interested in the ethical considerations that experiential media raise for journalism and the

Silicon Valley Signals: Technological Enthusiasm & the Times Nima Moinpour, 2020-04-12 How might we account for the effectiveness of Silicon Valley during our times Both as a place and as a cultural icon Silicon Valley has generated a mystique about its power to produce economic and cultural effects It speaks loudly in our civilization today and there is an aura of mystery about it How has Silicon Valley arrived at this point in its development Companies such as Apple Google Hewlett Packard and Intel compose part of the legend that Silicon Valley has become but the roots of that legend extend further in time and geography Others have approached the same questions and have noted its industrial roots but only reached so far back My contention is the modern economic and cultural phenomenon of Silicon Valley crystallized because of its local geomorphology and the ensuing technological enthusiasm contributed to its historical and material conditions for such techno mediatic unfolding This work will distinguish itself from others not just by connecting geography to technical developments but also by exploring the epistemological disposition that Silicon Valley claimed and spilled over into upcoming milieus of technological development

and civilizational progress By addressing the research questions through methods and concepts derived from Media Archeology methodology a methodology originating in the field of Media Studies I argue that the manifold inter involvements of geomorphology and technical enthusiasm account for the force of Silicon Valley in media history and the book takes you through various intersections of concrete pillars to build you a sound frame of mind about this mysterious region and culture

The Influencer Factory Grant Bollmer, Katherine Guinness, 2024-04-16 Influencers are more than social media personalities who attract attention for brands argue Grant Bollmer and Katherine Guinness They are figures of a new transformation in capitalism in which the logic of the self is indistinguishable from the logic of the corporation Influencers are emblematic of what Bollmer and Guinness call the Corpocene a moment in capitalism in which individuals achieve the status of living breathing talking corporations Behind the veneer of leisure and indulgence most influencers are laboring daily usually for pittance wages to manufacture a commodity called the self a raw material for brands to use with the dream of becoming corporations in human form by owning and investing in the products they sell Refuting the theory that digital labor and economies are immaterial Bollmer and Guinness search influencer content for evidence of the material infrastructure of capitalism Each chapter looks to what literally appears in the backgrounds of videos and images the houses cars warehouses and spaces of the market that

point back to the manufacturing and circulation of consumer goods Demonstrating the material reality of producing the self as a commodity The Influencer Factory makes a crucial contribution to our understanding of contemporary economic life
