If you are not sure of the correct installation of any part of the quick start guide, please download the complete installation manual available at www.autopageusa.com. This quick start guide is a brief summary for professional installers that are familiar with the installation and operation of the remote start system. Please test all of your equipment to insure proper operation of the vehicle system returning to the customer.

For additional technical support, please call 800-888-8888 and visit our website www.autopageusa.com through Saturday from 8:00 to 1:00 Pacific Standard Time.

The Remote Starter with Remote Entry System has been designed to be installed on Transponder systems with an Autopage Transmitter (DS-434).

1. Mount the unit where there is a remote transponder system.

The system must be installed and tested through a safety switch so it will not start in any forward or reverse gear.

Some Autopage Transponder systems may have other DS-434 vehicles with a remote starter and have a mechanical key lock safety switch instead of electrical safety switch. The mechanical key lock does not interrupt the starter circuit when the transponder is in any gear and does not allow the 100% level of safety required for remote starting systems. Therefore, our system should never be installed on any vehicle that has a mechanical key lock safety switch.

Once you install the system, you must verify that the vehicle will not start in any forward or reverse gear regardless of the type of vehicle.

2. Mount the system where there is a remote transponder system that can properly complete the installation. There is a possibility that the system cannot be installed on some Autopage Transponder vehicles.

3. Some vehicles have an ABS or air system. Some vehicles can start but do not start in any forward or reverse gear.

4. Disconnect the air battery before beginning work on the system.

Check battery polarity before wiring any system. Ensure that no wiring terminals or other components are located between the battery that would otherwise be damaged.

5. Do not use conventional jump box, battery or any other power source. Do not use jump wires with positive electrical conductivity into the start system and may result in false alarm or incorrect operation. The suggested installing of connection points.

6. Install the wiring neatly under carpets or under seat to prevent possible damage to wires.
