These Are Strange Times, My Dear Wendy Willis, 2019-02-05. In these pointed and wide-ranging essays, Wendy Willis explores everything from personal resistance to the rise of political podcasts, civic loneliness to the exploitation of personal data, public outrage to the opioid crisis, all with a poet's gift for finding the sacred in the mundane, a hope in the dark. One of the country's sharpest observers of politics, art, and the American spirit, Willis returns often to the demanding question posed by Czech writer, activist, and politician Václav Havel: What does it mean to live in truth? Her view is honed by her place as a poet, as a mother, and when necessary, as an activist. Together, the essays in *These Are Strange Times, My Dear* work within that largely unmapped place where the heartbreaks and uncertainties of one's inner life brush up against the cruelties and responsibilities of politics and government and our daily lives.

A Busy Mom's Guide to Entertaining Lisa A. Stukel, 2008-10. Small-scale laboratory simulations in a plasma tunnel were used to guide the formulation of a new dark energy theory. The simulations were used to demonstrate how and why dark energy produces the acceleration of main sequence stars. This led to the application of Newton's Law to quantify this star acceleration. This simulation forms the basis for a detailed explanation of how spiral galaxies and other galaxies and star groups were formed by dark energy. Finally, we are logically led to dark energy processes that would result in the formation of voids, walls, and clusters. Correlations between theoretical predictions

and astronomical observations show that the predictions are consistent with the observations Six additional chapters have been added in this second edition Two chapters include additional small scale laboratory simulations that are related to supersonic and hypersonic dark energy Two chapters give a detailed description of how dark energy acted as the catalyst that led to the formation of spiral galaxies as well as other types of galaxies and star groups The remaining two chapters outline how dark energy acted as the catalyst that resulted in the creation of Voids Walls and Clusters WTF?
