

Product Summary

The Intrusion Management software enables a user of the Symmetry Security Management System (SMS) software to operate the Hisec intrusion system and manage alarms and other activity.

A user can perform actions such as arm or disarm areas, reset alarms, bypass zones and switch outputs on or off. Alarms from the intrusion system are blended seamlessly into the Symmetry SMS software, becoming part of the standard SMS alarm monitoring and reporting system.

The Intrusion Management software is the ideal choice for organizations that require centralized control, monitoring and alarm management of a building's security system.

Thanks to the high versatility of the Symmetry SMS software, alarms or events from an intrusion system can automatically control other security equipment, such as video cameras, access-controlled doors and external devices. The result is a security management system that is ideally suited to meet the needs of any organization.

Total Alarm Management from a Single Interface

Alarms from the Hisec intrusion system are automatically displayed in the SMS Alarms screen and are recorded for historical reporting. Alarms are presented in exactly the same way as other SMS alarms, making it easy to manage alarms from different sources.

Each alarm type can be assigned a priority, color, sound and one or more definable instructions that are presented to the guard when the alarm occurs.

When acknowledging an alarm, a user can enter or select comments to record the actions taken, which may be important when reviewing the alarm at a later date.

An added benefit is that acknowledging or clearing an alarm automatically silences or clears the alarm at the panel.

Key Features

- Gives centralized alarm handling and reporting
- Allows Symmetry SMS users to operate the Hisec intrusion system
- Enables automatic triggering of other security equipment
- Allows automatic arming/disarming from access-control transactions
- Provides instant monitoring from the Intrusion Status Toolbar
