C. Phillips,2014-05-19 Education is a field sometimes beset by theories of the day and with easy panaceas that overpromise the

degree to which they can alleviate pressing educational problems The two volume Encyclopedia of Educational Theory and Philosophy introduces readers to theories that have stood the test of time and those that have provided the historical foundation for the best of contemporary educational theory and practice Drawing together a team of international scholars this invaluable reference examines the global landscape of all the key theories and the theorists behind them and presents them in the context needed to understand their strengths and weaknesses In addition to interpretations of long established theories this work offers essays on cutting edge research and concise to the point definitions of key concepts ideas schools and figures Features Over 300 signed entries by trusted experts in the field are organized into two volumes and overseen by a distinguished general editor and an international editorial board Entries are followed by cross references and further reading suggestions A Reader s Guide groups entries thematically The Reader s Guide detailed index and cross references combine for strong search and browse capabilities in the electronic version Available in a choice of print or electronic formats Encyclopedia of Educational Theory and Philosophy is an ideal reference for anyone interested in the roots of contemporary educational theory Key Themes Aims of Education Classic Premodern Philosophers Theories and Theorists Curriculum Educational Research Evaluation and Testing Equity Rights Social Stratification and Citizenship Higher Education Learners Learning and Teaching Liberal Education Moral Religious Spiritual and Social Cultural Values Multiculturalism and Special Populations Organization of Schooling Philosophy of Science Sociology of Science and Epistemology Philosophy of Education Feminist Perspectives Philosophy of Education Nonwestern Traditions Philosophy of Education The Analytic Tradition Philosophy of Education The Continental Traditions Philosophy of Education The Political Theory Tradition Philosophy of Education The Pragmatic Tradition Progressive Education Psychological Orientation in Educational Theory Social Sciences Orientation in Educational Theory Education and the Kyoto School of Philosophy Paul Standish, Naoko Saito, 2012-07-04 The work of the Kyoto School represents one of the few streams of philosophy that originate in Japan Following the cultural renaissance of the Meiji Restoration after Japan s period of closure to the outside world 1600 1868 this distinctly Japanese thought found expression especially in the work of Kitaro Nishida Keiji Nishitani and Hajime Tanabe Above all this is a philosophy of experience of human becoming and of transformation In pursuit of these themes it brings an inheritance of Western philosophy that encompasses William James Hume Kant and Husserl as well as the psychology of Wilhelm Wundt into conjunction with Eastern thought and practice Yet the legacy and continuing reception of the Kyoto School have not been easy in part because of the coincidence of its prominence with the rise of Japanese fascism In light of this then the School s ongoing relationship to the thought of Heidegger has an added salience And yet this remains a rich philosophical line of thought with remarkable salience for educational practice The present collection focuses on the Kyoto School in three unique ways First it concentrates on the School s distinctive account of human becoming Second it examines the way that in the work of its principal exponents diverse traditions of thought in philosophy and education are

encountered and fused Third and with a broader canvas it considers why the rich implications of the Kyoto School for philosophy and education have not been more widely appreciated and it seeks to remedy this The first part of the book introduces the historical and philosophical background of the Kyoto School illustrating its importance especially for aesthetic education while the second part looks beyond this to explore the convergence of relevant streams of philosophy East and West ranging from the Noh play and Buddhist practices to American transcendentalism and post structuralism
