Object Oriented Programming ECOOP 95 held in Aarhus Denmark in August 1995 Besides the scientific conference documented in this book ECOOP 95 included a number of tutorials and workshops as well as a two day technology exhibition and thus reflects the full spectrum of Object Oriented Programming The volume presents three invited contributions and 18 full research papers selected from more than 90 submissions The papers are organized in sections on types programming languages reflective programming and verification implementation concurrency and specification and distribution and interfaces PUBLISHER'S WEBSITE **ECOOP - Object-Oriented Programming** Erik Ernst, 2007-07-27

The 21st European Conference on Object Oriented Programming ECOOP 2007 was held in Berlin Germany on July 30 to August 3 2007 ECOOP is the most important and inspiring forum in Europe and beyond for researchers practitioners and students working in that smorgasbord of topics and approaches known as object orientation This topic area was explored and challenged by excellent invited speakers two of which were the winners of this year's Dahl Nygaard award in the carefully refereed and selected technical papers on posters via demonstrations and in tutorials Each of the many workshops complemented this with

a very interactive and dynamic treatment of more specific topics. Panel discussions allowed for loud and lively disagreement. Yet it is one of ECOOP's special qualities that this plethora of activities add up to a coherent and exciting whole rather than deteriorating into chaos. The Program Committee received 161 submissions this year. Only 135 of them were carried through the full review process because of a number of technicalities and a number of submissions of abstracts that were never followed by a full paper. However, the remaining papers were of very high quality and we accepted 25 of them for publication. Helping very good papers to be published is more useful than having an impressively low acceptance rate. The papers were selected according to four groups of criteria whose priority depended on the paper's relevance, originality and significance, precision and correctness and presentation and clarity. Each paper had three, four or five reviews depending on how controversial it was.

Advances in Database Technology - EDBT 2006 Yannis Ioannidis, Marc H. Scholl, Joachim W. Schmidt, Florian Matthes, Mike Hatzopoulos, Klemens Boehm, Alfons Kemper, Torsten Grust, Christian Boehm, 2006-03-10. This book constitutes the refereed proceedings of the 10th International Conference on Extending Database Technology EDBT 2006 held in Munich, Germany, in March 2006. The 60 revised research papers presented together with eight industrial application papers, 20 software demos and three invited contributions were carefully reviewed and selected from 352 submissions. The papers are organized in topical sections.
