Business Politics And The State In Twentieth Century Latin America:

Business Politics and the State in Twentieth-Century Latin America Ben Ross Schneider, 2004-08-16 Publisher Description *Business Politics and the State in Twentieth-Century Latin America* David Fuller, 2017-03-15 Ben Schneider's comparative historical analysis of the incorporation of business into politics in Latin America examines business organization and political activity over the last century in five of the largest and most developed countries of the region. Schneider's explanation for why business became better organized in Chile, Colombia, and Mexico than in Argentina and Brazil lies neither in economic characteristics of business nor broader political parameters but rather in the cumulative effect of state policy actions.

Business Politics and the State in Twentieth Century Latin America Jason Boulanger, 2017-10-24 Ben Schneider's comparative historical analysis of the incorporation of business into politics in Latin America examines business organization and political activity over the last century in five of the largest and most developed countries of the region. Schneider's explanation for why business became better organized in Chile, Colombia, and Mexico than in Argentina and Brazil lies neither in economic characteristics of business nor broader political parameters but rather in the cumulative effect of state policy actions.

State-Business Alliances and Economic Development Işık Özel, 2014-08-07 This book argues that a key dynamic behind economic development in the emerging markets is the coordination between the state and businesses. Exploring the links between institutions, state-business alliances, and economic development in the context of tumultuous market transitions since the 1980s, the book tackles the formation and sustainability of coordination-inducing institutions besides their mere existence and points out the new modalities of coordination in the age of new developmentalism. Based on extensive original research in Turkey and Mexico, embedded in a comparative historical analysis, the book shows how state-business alliances have been formed, collapsed, and reformed between the respective states and shifting business actors since the launching of market transitions. It demonstrates how both the state and business actors and their cohesiveness vs. fragmentation play crucial roles in the making and sustainability of the institutions which are central to state-business alliances. It explores the emergence of new actors, the diversification of the organizational landscape, and the evolution of the ways in which the states interact with businesses throughout major economic and political transformations that helped transform the respective states and their interactions with the non-state actors. It draws on the meandering developmental trajectories of Turkey and Mexico from the 1970s to the present and goes on to draw some lessons for institution building and market reforms in selected countries in North Africa.

[Big Business and Dictatorships in Latin America](#) Victoria Basualdo, Hartmut Berghoff, Marcelo Bucheli, 2020-12-04 This edited volume studies the relationship between big business and the Latin American dictatorial regimes during the Cold War. The first section provides a general background about the contemporary history of business corporations and dictatorships in the twentieth century at the international level. The second section comprises chapters that analyze five national cases: Argentina, Brazil, Chile, Uruguay, and Peru, as well as a comparative analysis of the banking sector.

in the Southern Cone Argentina Brazil Chile and Uruguay The third section presents six case studies of large companies in Argentina Brazil Chile Colombia and Central America This book is crucial reading because it provides the first comprehensive analysis of a key yet understudied topic in Cold War history in Latin America *Business-State Relations in Brazil* Mahrukh Doctor, 2016-12-19 In recent years the spotlight of international attention on Brazil has often been in the area of logistics infrastructure for example on its capacity to deal with the high demand expected during the World Cup and the Olympics However neither competitiveness nor infrastructure concerns are new for Brazil In the 1990s Brazilian policy makers adopted a series of liberalizing economic reforms that exposed the poor condition of logistics infrastructure and inadequate investment in Brazilian ports roads railways and airports Over twenty years later the implications of those reforms still colour Brazil's prospects for development Mahrukh Doctor's book evaluates the political economy of reform in Brazil and the difficulty of implementing institutional modernization in the context of opposition from vested interests originating in the state and civil society It focuses specifically on the Port Modernization Law which aimed to augment the country's competitiveness by creating efficient and low cost ports Based on primary research carried out over a period of twenty years using original qualitative data Doctor's analysis focuses on the difficulties in implementing this law and how those difficulties are symptomatic of the wider issues associated with lack of sufficient investment in infrastructure in Brazil Using the case of the business lobby for port reform the book examines the evolving nature of business state relations and the process of institutional change in Brazil Doctor particularly examines the building of consensus for reform and policy formulation in the port sector and the challenges of reform implementation and institutional modernisation The analysis provides extensive insights and lessons related to the prospects for boosting competitiveness of Brazilian ports The book concludes by suggesting a likely path for the evolution of corporatist institutions as well as the provision of adequate logistics infrastructure to support business success in Brazil A unique work on the subject of port reform in Latin America that uses a hybrid analytical framework to understand reform in Brazil this book is pertinent for a variety of subjects from Latin American Studies to political economy to economic policy making *Business of the State* Jewellord T. Nem Singh, 2024-06-26 As the world moves towards decarbonization and the race for clean energy technologies accelerates states in the global south are increasingly called upon to supply critical minerals to fuel the transition *Business of the State* details how mineral states might design effective growth strategies in this context of strategic competition and climate emergency via the rise of a hybrid developmental strategy during 1990s and 2010s the embrace of market conforming policies to attract FDI and the reassertion of state owned enterprises SOEs as players in industrial development Drawing from the experiences of Brazil's Petrobras and Chile's Codelco the book argues that SOEs might open new pathways for technological innovation and even support industrial policy if subjected to effective governance reforms and aligned with the private sector In this way the book shifts the analytical lens away from extractivism as a growth model and towards hybrid development strategies

formulated through SOEs Business of the State asks fundamental questions about states and markets why do states seek to intervene in the affairs of public enterprises And what role might they play in structural transformation The book provides answers using a historical institutionalist framework process tracing the complex process of market reforms in highly strategic natural resource industries Democracy and Capitalism in Turkey Devrim Adam Yavuz,2023-02-23 While a positive correlation between capitalism and democracy has existed in Western Europe and North America the example of late industrializing nations such as Turkey has demonstrated that the two need not always go hand in hand and sometimes the interests of business coincide more firmly with anti democratic forces This book explores the factors that compelled capitalists in Turkey to adopt a more pro democratic ideology by examining a leading Turkish business lobby T SIAD which has been pushing for democratic reform since the 1990s despite representing some of the largest corporation owners in Turkey and having supported the state s authoritarian tendencies in the past such as the military coup of 1980 Drawing on roughly 70 interviews with influential members of T SIAD and individuals close to them the book reveals that business leaders were willing to break away from the state due to the conflict between their evolving economic needs and power with a political elite and state that were unwilling to cater to their demands In so doing the book provides a rich account of business state relations in Turkey as well as providing a case study for the wider study of democracy and capitalism in developing nations **The Politics of National Capitalism** James P. Brennan,Marcelo Rougier,2009 An analysis of the social relations political strategies and history behind capitalist economic development in Latin America with particular attention to Argentina Provided by publisher The Oxford Handbook of Mexican Politics Roderic Ai Camp,2012-02-16 A comprehensive view of the remarkable transformation of Mexico s political system to a democratic model The contributors to this volume assess the most influential institutions actors policies and issues in the country s current evolution toward democratic consolidation
