Necessary Architecture Alisia Tognon, Luca Trabattoni,2021-09-16 Niger is sand light and heat Starting from the necessity of the Mission Catholique du Dosso which has worked in Niger for several years this book speaks about the Nigerien situation which is characterized by a countrywide spread of poverty Along with studying the country s environmental geographical conditions the book discusses raw earth architecture in both vernacular and contemporary contexts A number of the most common techniques are described The possibilities for these methods to adapt to the contemporary language of architecture without losing the technical and physical benefits inherent in them are illustrated The book embraces some topics that are not common but highly relevant in the Developing World such as identity through the evolution of architecture and the value of transmitting knowledge related to the vernacular building process Nowadays Niger s condition is characterized by a lack of resources both physical and cultural Earthen technology appears to be a valid solution in this situation for the creation of an environmentally sustainable approach The book aims to provide an overview of the possibility of constructing new buildings related to the climate and traditional context applying vernacular technology and solutions in a contemporary application Providing a balance between teaching vernacular knowledge and the contemporary architectural language could help face this out of resource situation aiming to get comfortable and affordable living spaces

Contemporary Architecture and the Digital Design Process Peter Szalapaj,2014-04-23 Contemporary Architecture and the Digital Design Process introduces the reader to new developments in the computer modelling of design form in contemporary architectural practice through a series of detailed case studies The book illustrates how evolving design practices use and exploit the potential of new computing technologies in a wide range of areas and application A central thesis of this book is that technology follows design demand rather than design adjusting to available new technology Designers are not merely passive recipients of prescribed computing tools and techniques Instead they are increasingly able to express their intuitive design ideas through the rational medium of computing The book features several contemporary

building projects each of which introduces a range of CAD and computing issues based upon the work of creative architectural and engineering design practices These include the offices of Frank O Gehry Peter Cook and Colin Fournier Anthony Hunt Associates Peter Hubner Szyskowitz Kowalski and Faulkner Brown All these examples show what architects need to know and the skills they need to acquire to use advanced CAD technology *The Masjid in Contemporary Islamic Africa* Michelle Moore Apotsos, 2021-07-29 This volume examines the emergence of alternative spaces and architectural landscapes of Islamic practice in contemporary Africa through the lens of the masjid whose definition as a place of prostration has enabled Muslim populations across the continent to navigate the murky waters of the contemporary condition through a purposeful renovation of spiritual space Drawing from multiple disciplines and utilizing a series of diverse case studies Michelle Apotsos reflects on the shifting realities of Islamic communities as they engage in processes of socio political and cultural transformation Illustrated through the growth of forward thinking and in flexible environments that highlight how Muslim communities have developed unique solutions to the problem of performing identity within diverse contexts across the continent she re imagines the major themes surrounding definitions of Islamic architectural space in the contemporary period in Africa and the nature of the modernity as it has unfolded across diverse contexts on the continent
