a particular focus on how economic polycentrism and the liberal international economic order have influenced the sector's regulatory framework. It discusses the aviation industry's responses to unforeseen global events such as the COVID-19 pandemic and geopolitical conflicts, providing a detailed analysis of the legal mechanisms that ensure industry stability and resilience. Key topics include the role of arbitration in resolving disputes, the impact of international regulations, and the critical contributions of both public and private actors in shaping aviation law. Additionally, the book explores the challenges posed by new and emerging technologies such as the increasing automation in aviation systems and the legal considerations surrounding cybersecurity in aviation operations. The collection also features diverse international case studies offering practical examples of legal challenges and solutions in different contexts. By examining the intersection of various legal disciplines and the global nature of aviation, this comprehensive exploration not only reflects on past and present challenges but also provides forward-looking insights into the future of aviation law. The book will be of interest to researchers in the field of air transport law and dispute resolution, offering a thorough understanding of the legal and economic complexities facing the industry today.
