The Body Lisa Jean Moore, Monica Casper, 2014-11-06 This college level handbook offers a comprehensive and accessible overview of sociological and cultural perspectives on the human body Organized along the lines of a standard anatomical textbook delineated by body parts and processes this volume subverts the expected content in favor of providing tools for social and cultural analysis Students will learn about the human body in its social cultural and political contexts with emphasis on multiple contested meanings of the body body parts and systems Case studies examples and discussion questions are both US based and international Advancing critical body studies the book explicitly discusses bodies in relation to race class gender sexuality ability age health geography and citizenship status The framing is sociological rather than biomedical attentive to cultural meanings institutional practices politics and social problems The authors use commonly understood anatomical frames to discuss social cultural political and ethical issues concerning embodiment

Save the Bees! Lisa Jean Moore, Mary Kosut, 2014-09-01 Grappling with the strange phenomenon of colony collapse disorder the baffling disappearance of all bees from a hive that is often blamed for the honeybee's increasingly endangered status New York City's hobbyist beekeeping communities have gone green Lisa Jean Moore and Mary Kosut introduce beekeepers of all stripes the careful cultivators of scientific beekeeping groups the passionately political radical backwards beekeepers who hope to return the species to its most natural state and DIY influenced hipster beekeepers who share a holistic approach to lowering their environmental impact Though their approaches may differ these beekeepers agree on one thing to save the bee is to save our planet

Buzz Lisa Jean Moore, Mary Kosut, 2013-09-27 Winner 2014 Distinguished Scholarship Award presented by the Animals we can create buzz we have worker bees drones and Queen bees we establish collectives and even have communities that share a hive mind In Buzz authors Lisa Jean Moore and Mary Kosut convincingly argue that the power of bees goes beyond the food cycle bees are our mascots our models and unlike any other insect are both feared and revered In this fascinating account Moore and Kosut travel into the land of urban beekeeping in New York City where raising bees has become all the rage We follow them as they climb up on rooftops attend beekeeping workshops and honey festivals and even put on full body beekeeping suits and open up the hives In the process we meet a passionate dedicated and eclectic group of urban beekeepers who tend to their brood

with an emotional and ecological connection that many find restorative and empowering Kosut and Moore also interview professional beekeepers and many others who tend to their bees for their all important production of a food staple honey The artisanal food shops that are so popular in Brooklyn are a perfect place to sell not just honey but all manner of goods soaps candles beeswax beauty products and even bee pollen Buzz also examines media representations of bees such as children's books films and consumer culture bringing to light the reciprocal way in which the bee and our idea of the bee inform one another Partly an ethnographic investigation and partly a meditation on the very nature of human insect relations Moore and Kosut argue that how we define visualize and interact with bees clearly reflects our changing social and ecological landscape pointing to how we conceive of and create culture and how in essence we create ourselves *Biopolitics* Thomas Lemke, 2011-02-15 The biological features of human beings are now measured observed and understood in ways never before thought possible defining norms establishing standards and determining average values of human life While the notion of biopolitics has been linked to everything from rational decision making and the democratic organization of social life to eugenics and racism Thomas Lemke offers the very first systematic overview of the history of the notion of biopolitics exploring its relevance in contemporary theoretical debates and providing a much needed primer on the topic Lemke explains that life has become an independent objective and measurable factor as well as a collective reality that can be separated from concrete living beings and the singularity of individual experience He shows how our understanding of the processes of life the organizing of populations and the need to govern individuals and collectives lead to practices of correction exclusion normalization and disciplining In this lucidly written book Lemke outlines the stakes and the debates surrounding biopolitics providing a systematic overview of the history of the notion and making clear its relevance for sociological and contemporary theoretical debates

Missing Bodies Monica Casper, Lisa Jean Moore, 2009-07 We know more about the physical body how it begins how it responds to illness even how it decomposes than ever before Yet not all bodies are created equal some bodies clearly count more than others and some bodies are not recognized at all In *Missing Bodies* Monica J Casper and Lisa Jean Moore explore the surveillance manipulations erasures and visibility of the body in the twenty first century The authors examine bodies both actual and symbolic in a variety of arenas pornography fashion sports medicine photography cinema sex work labor migration medical tourism and war This new politics of visibility can lead to the overexposure of some bodies Lance Armstrong Jessica Lynch and to the near invisibility of others dead Iraqi civilians illegal immigrants the victims of HIV AIDS and natural disasters *Missing Bodies* presents a call for a new engaged way of seeing and recovering bodies in a world that routinely often strategically obscures or erases them It poses difficult even startling questions Why did it take so long for the United States media to begin telling stories about the falling bodies of 9 11 Why has the United States government refused to allow photographs or filming of flag draped coffins carrying the bodies of soldiers who are dying in Iraq Why are the bodies of girls and women so relentlessly sexualized By examining the cultural politics at

work in such disappearances and inclusions of the physical body the authors show how the social medical and economic consequences of visibility can reward or undermine privilege in society *Buzz* Thor Hanson,2018-07-10 As seen on PBS's American Spring LIVE the award winning author of *The Triumph of Seeds and Feathers* presents a natural and cultural history of bees the buzzing wee beasties that make the world go round Bees are like oxygen ubiquitous essential and for the most part unseen While we might overlook them they lie at the heart of relationships that bind the human and natural worlds In *Buzz* the beloved Thor Hanson takes us on a journey that begins 125 million years ago when a wasp first dared to feed pollen to its young From honeybees and bumbles to lesser known diggers miners leafcutters and masons bees have long been central to our harvests our mythologies and our very existence They've given us sweetness and light the beauty of flowers and as much as a third of the foodstuffs we eat And alarmingly they are at risk of disappearing As informative and enchanting as the waggle dance of a honeybee *Buzz* shows us why all bees are wonders to celebrate and protect Read this book and you'll never overlook them again *Buzzing Cities* Barrett Williams,ChatGPT,2025-04-04 *Buzzing Cities* Unleashing the Vibrancy of Urban Beekeeping Dive into the fascinating and industrious world of urban beekeeping with *Buzzing Cities* This enlightening eBook reveals the bustling life of bees within city landscapes offering a unique look at how these remarkable creatures transform our urban environments Begin your journey with an introduction to the rich yet often overlooked history of beekeeping in metropolitan settings Discover the integral role bees play in maintaining urban ecosystems from enhancing garden pollination to boosting biodiversity amidst concrete and steel Ready to start your own urban beehive *Buzzing Cities* guides you through selecting the right hive for tight city spaces understanding crucial legal considerations and choosing the best bee breeds suited for urban living Delve into the intricacies of managing urban bee colonies tackling seasonal challenges and ensuring hive health against urban stressors Even the urban heat island effect is no match for your growing expertise Learn how to strategically place hives and adapt to temperature fluctuations unique to cities *Buzzing Cities* also highlights sustainable management techniques empowering you to reduce disease and promote robust colonies Explore the rewarding process of harvesting honey in the city Extract package and market your own urban honey connecting you with local markets and building economic opportunities Engage with your community as you cultivate bee friendly neighborhoods and educate others through workshops and public outreach With insightful case studies and stories of successful urban beekeeping initiatives *Buzzing Cities* provides practical examples and inspiration It also looks to the future highlighting technological innovations and the promising intersection of beekeeping and urban agriculture Empower yourself and your city by nurturing the next generation of urban beekeepers Whether you're an aspiring beekeeper an environmental enthusiast or a city planner *Buzzing Cities* is your comprehensive guide to creating vibrant sustainable urban environments one hive at a time Embrace the buzz and transform your city into a thriving ecosystem of possibilities ***The Buzz of Life*** Barrett Williams,ChatGPT,2025-03-26 Discover the mesmerizing world of bees with *The Buzz of Life* an enlightening journey
