2-1 (a) Poles: $s = 0, 0, -1, -10$;

Zeros: $s = -2, \infty, \infty, \infty$.

(b) Poles: $s = -2, -2$;

Zeros: $s = 0$.

The pole and zero at $s = -1$ cancel each other.

(c) Poles: $s = 0, -1 + j, -1 - j$;

Zeros: $s = -2$.

(d) Poles: $s = 0, -1, -2, \infty$.

2-2) a)
$$G(s) = \frac{(s+1)}{s(s+2)(s+3)^2}$$

b)
$$G(s) = \frac{s^2}{(s+1)(s+4)}$$

c)
$$G(s) = \frac{s^2 - 1}{s^2(s+3)(s+1)^2}$$

Proceedings of the 9th International Conference on Energy Engineering and Environmental Engineering Zuoyu Sun, Prodip Das, 2023-06-29 This book the conference proceeding contains invited articles and contributory papers from the 9th International Conference on Energy Engineering and Environmental Engineering organized by Beijing Jiao Tong University in Sanya China on December 9 10 2022 It includes contributions from researchers and practitioners working in the area of energy engineering hydrogen hydrogen carriers technology environmental engineering climate change global warming and related fields The articles cover the topics such as new energy production storage transmission electrolysis electrolyzes chemical thermochemical electrochemical hydrogen energy environmental protection and environmental sustainability The content caters to research scholars students industry professionals companies government bodies and policymakers who work in the field of energy and environmental engineering

Advanced Manufacturing and Automation IX Yi Wang, Kristian Martinsen, Tao Yu, Kesheng Wang, 2020-01-03 This book presents selected papers from the 9th International Workshop of Advanced Manufacturing and Automation IWAMA 2019 held in Plymouth UK on November 21 22 2019 Discussing topics such as novel techniques for manufacturing and automation in Industry 4 0 and smart factories which are vital for maintaining and improving economic development and quality of life it offers researchers and industrial engineers insights into implementing the concepts and theories of Industry 4 0 in order to effectively respond to the challenges posed by the 4th industrial revolution and smart factories

Canal Systems Automation Manual , 1991

Offshore Electrical Engineering Manual Geoff MacAngus-Gerrard, 2017-11-06 Offshore Electrical Engineering Manual Second Edition is for electrical engineers working on offshore projects who require detailed knowledge of an array of equipment and power distribution systems The book begins with coverage of different types of insulation hot spot temperatures temperature rise ambient air temperatures basis of machine ratings method of measurement of temperature rise by resistance measurement of ambient air temperature This is followed by coverage of AC generators automatic voltage regulators AC switchgear transformers and programmable electronic systems The emphasis throughout is on practical ready to apply techniques that yield immediate and cost effective benefits The majority of the systems covered in the book operate at a nominal voltage of 24 y dc and although it is not necessary for each of the systems to have separate battery and battery charger systems the grouping criteria require more detailed discussion The book also provides information on equipment such as dual chargers and batteries for certain vital systems switchgear tripping closing and engine start batteries which are dedicated to the equipment they supply In the case of engines which drive fire pumps

duplicate charges and batteries are also required Packed with charts tables and diagrams this work is intended to be of interest to both technical readers and to general readers It covers electrical engineering in offshore situations with much of the information gained in the North Sea Some topics covered are offshore power requirements generator selection process drivers and starting requirements control and monitoring systems and cabling and equipment installation Discusses how to perform inspections of electrical and instrument systems on equipment using appropriate regulations and specifications Explains how to ensure electrical systems components are maintained and production is uninterrupted Demonstrates how to repair modify and install electrical instruments ensuring compliance with current regulations and specifications Covers specification management and technical evaluation of offshore electrical system design Features evaluation and optimization of electrical system options including DC AC selection and offshore cabling designs

an introduction to the theory of control in mechanical engineering , Understanding Islam: Addressing Challenges & Exploring Solutions Anwar Hussain Khan,2025-03-21 This book begins by exploring profound spiritual questions why human beings believe in the existence of God the need and role of God and religion in our lives and the ways religion can be both used and misused It also examines how science and religion are complementary rather than conflicting It addresses common misconceptions about Islam and provides factual information on key aspects of the religion such as its core beliefs practices moral conduct tolerance quest for knowledge and science focusing on creating a understanding of Islam through evidences based directly on the verses of the Holy Quran It presents Islam s contributions to the world in social and scientific fields It is written in a way that both non Muslims and Muslims will find it informative The book also addresses issues such as reformist and progressive nature of Islam The book emphasizes both the importance of revealing the truth about Islam and tackling the myths that often surround the religion offering a fresh perspective in a modern context The achievements of Muslims in fields such as mathematics science astronomy and medicine during the Islamic Golden Age are highlighted to provide an optimistic perspective to younger generations Additionally it includes articles on current issues and present challenges exploring possible reasons for the rise and decline of scientific approach within the Muslim community as well as explores suggested ways forward as perceived by the author Any disagreements with these views shall be respected

Computer Integrated Manufacturing (Iccim '91): Manufacturing Enterprises Of The 21st Century - Proceedings Of The International Conference B S Lim,1991-10-02 In the 21st century computer integrated manufacturing CIM systems will not only be the economic development tools but will also be the essential means of achieving a higher level of flexibility cohesiveness and performance CIM systems are beginning to settle into our society and industries with greater emphasis on the integration of economic cultural and social aspects together with design planning factory automation and artificial intelligent systems This volume of proceedings brings together 10 keynote and invited speaker addresses and over 180 papers by practitioners from 28 countries It documents current research and in depth studies on the fundamental aspects of advanced CIM systems and their

practical applications The papers fall into 3 main sections CIM Related Issues Industrial AI Applications Aspects and Concurrent Engineering Advanced Design Simulation and Flexible Manufacturing Systems Plant Intelligent Automation and Digital Transformation Swapan Basu,2022-10-28 Plant Intelligent Automation and Digital Transformation Process and Factory Automation is an expansive four volume collection reviewing every major aspect of the intelligent automation and digital transformation of power process and manufacturing plants from the specific control and automation systems pertinent to various power process plants through manufacturing and factory automation systems This volume introduces the foundations of automation control theory networking practices and communication for power process and manufacturing plants considered as integrated digital systems In addition it discusses Distributed control System DCS for Closed loop controls system CLCS and PLC based systems for Open loop control systems OLCS and factory automation This book provides in depth guidance on functional and design details pertinent to each of the control types referenced above along with the installation and commissioning of control systems Introduces the foundations of control systems networking and industrial data communications for power process and manufacturing plant automation Reviews core functions design details and optimized configurations of plant digital control systems Addresses advanced process control for digital control systems inclusive of software implementations Provides guidance for installation commissioning of control systems in working plants

An Introduction to the Theory of Control in Mechanical Engineering R. H. Macmillan,2016-05-26 Originally published in 1951 and the first English book on the subject this textbook is aimed at both the specialist and non specialist alike and provides a thorough and detailed introduction on the principles that underlie the action of automatic controls servo mechanisms and regulators The early chapters provide a solid foundation to the theory of control and are in the most part descriptive introducing fundamental terminology and explaining the principles which underlie the operation of all control systems whilst in the last three chapters more advanced techniques are used to give an account of the methods employed by control engineers Modern contributions to the theory at the time are included and questions are set at the end of each chapter Giving a historical summary of the main landmarks in the development of control theory this book will be of value to anyone with an interest in the history of engineering
