Serving Library Users from Asia John Hickok, 2019-06-12 Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published e.g. disabled Latino seniors etc, few books on serving library users of Asian heritage have been written. Thus the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters each on 24 specific Asian countries, cultures of East Southeast and South Asia with a wealth of resources for understanding, interacting with, outreaching to and serving library users of each culture. Resources include cultural guides, both print and online, language helps with sample library vocabulary, Asian booksellers, nationwide cultural groups, professional literature and more. Resources and suggestions are given for all three types of libraries: public, school and academic, making this book valuable for all librarians. The demographics of each Asian culture, numbers and distribution, plus history of immigration and international student enrollment is also featured. As a bonus, each chapter spotlights a US public school and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems and more of public school and academic libraries are all discussed with detailed documentation. Country conditions influencing libraries and library use are also described. Literacy levels, reading cultures, languages and writing systems, educational systems and more. Based on the author's 15 years of research and travels to Asia, this work is a must have for all librarians. **Globalization and Defence**

in the Asia-Pacific Geoffrey Till, Emrys Chew, Joshua Ho, 2009 This edited volume examines the impact of globalisation on the economies, security policies and military industrial complexes of the Asia Pacific region. The work is structured into three main parts. The first explores globalization and its general effects on the policy making of the nation state. The second section looks at how globalisation affects a country's threat perception and defence posture within the specific context of the Asia Pacific region while the third explores how it impacts on a state's allocation of resources to defence and how economic globalization affects the defence industry with specific reference to the procurement policies and practices of different states across the Asia Pacific. **Soft Computing Techniques and Applications** Samarjeet Borah, Ratika Pradhan, Nilanjan Dey, Phalguni Gupta, 2020-11-27

Focusing on soft computing techniques and application in various engineering research domains, this book presents the state of the art outcomes from ongoing research works being conducted in various research laboratories and educational institutions. The included research works deal with estimated models and give resolutions to complex real life issues. In the field of evolutionary computing and other domains of applications such as data mining and fuzzy logic, soft computing techniques play an incomparable role where it successfully handles contemporary computationally intensive and complex problems that have usually appeared to be inflexible to traditional mathematical methods. Comprising the concepts and applications of soft computing with other emerging research domains, this book cherishes varieties of
