In this volume, a diverse group of recognized scholars inside and outside the United States balance theory, research and practice, often taking a global perspective. Divided into eight parts, chapters cover issues associated with measurement such as validity and reliability as well as practical concerns around the development of appropriate selection procedures and implementation of selection programs. Several chapters discuss the measurement of various constructs commonly used as predictors and other chapters confront criterion measures that are used in test validation. Additional sections include chapters that focus on ethical and legal concerns and testing for certain types of jobs, e.g. blue collar jobs. The second edition features a new section on technology and employee selection. Data-Driven Decision Making in Entrepreneurship Nikki Blacksmith, Maureen E. McCusker, 2024-04-02 Since the beginning of the 21st century, there has been an explosion in startup organizations. Together, these organizations have been valued at over 3 trillion. In 2019 alone, nearly 300 billion of venture capital was invested globally. Global Startup Ecosystem Report 2020.
