Bodies Of Technology Womens Involvement With Reproductive Medicine Women Health:

Bodies of Technology Ann Rudinow Saetnan, Nelly Oudshoorn, Marta Stefania Maria Kirejczyk, 2000 This work is based on a concern for women's health and autonomy and on the premise that technology and society mutually shape one another A basic question is one of cultural appropriation Do technologies take on different shapes different practices and have different impacts as they spread from one place to another By juxtaposing a number of culturally and historically contextualized studies of similar technologies the editors demonstrate that although technologies globalize by spreading among cultures they are also localized by the cultures they encounter *Women's Health and Medicine: Transforming Perspective* Alice J.

Dan, Sue V. Rosser, 2003-06 A vital collection of essays on women's health and women's health studies edited by leaders in the field

Revolutionizing Women's Healthcare Hannah Dudley-Shotwell, 2020-03-13 Winner of the 2021 Frances Richardson Keller Sierra Prize from the Western Association of Women Historians WAWH Revolutionizing Women's Healthcare is the story of a feminist experiment the self help movement This movement arose out of women's frustration anger and fear for their health Tired of visiting doctors who saw them as silly little girls suffering shame when they asked for birth control seeking abortions in back alleys and holding little control over their own reproductive lives women took action Feminists created self help groups where they examined each other's bodies and read medical literature They founded and ran clinics wrote books made movies undertook nationwide tours and raided and picketed offending medical institutions Some performed their own abortions Others swore off pharmaceuticals during menopause Lesbian women found at home ways to get pregnant Black women used self help to talk about how systemic racism affected their health Hannah Dudley Shotwell engagingly chronicles these stories and more to showcase the creative ways women came together to do for themselves what the mainstream healthcare system refused to do

Prosthetic Bodies I. van der Ploeg, 2013-04-17 Among the vast literature on contemporary reproductive technologies Prosthetic Bodies stands out in its effective combination of insights methods and theories from the history of medicine constructivist science and technology studies and feminist theory The double focus on IVF and related techniques and fetal treatment and surgery enables the identification of debatable tendencies within today's reproductive medicine the translation of ever more medical problems basically unrelated to women's own reproductive health and in the case of fetal diagnosis and treatment sometimes formerly even unrelated to reproduction as such into medical indications for invasive often highly experimental interventions in women's bodies The analyses show how through the operations and workings of reproductive technologies themselves as well as a variety of discursive mechanisms within scientific language today's recasting of men's fertility problems and children's congenital anomalies as women's reproductive problems comes to appear inevitable The book challenges the ability of traditional forms of medical ethics and law to adequately identify this incremental process The careful analyses and arguments in Prosthetic Bodies will be relevant to students of science and technology gender studies philosophy medical ethics and law and others

interested in the cultural ethical and political ramifications of contemporary reproductive technologies *Biomedicalization* Adele E. Clarke, Laura Mamo, Jennifer Ruth Fosket, Jennifer R.
