Bodybuilding Drugs And Risk Health Risk And Society:

Bodybuilding, Drugs, and Risk Lee F. Monaghan, 2001 Current popular interest in bodies fitness sport and active lifestyles has made bodybuilding more visible and acceptable within mainstream society than ever before However the association between bodybuilding drugs and risk has contributed to a negative image of an activity which many people find puzzling Using data obtained from participant observation and interviews this book explores bodybuilding subculture from the perspective of the bodybuilder It looks at How bodybuilders try to maintain competent social identities How they manage the risks of using steroids and other physique enhancing drugs How they understand the alleged steroid violence link How they see the muscular body Through systematic exploration it becomes apparent that previous attempts to explain bodybuilding in terms of masculinity in crisis or gender insecurity are open to question Different and valuable insights into what sustains and legitimizes potentially dangerous drug taking activities are provided by this detailed picture of a huge underground subculture

Bodybuilding, Drugs and Risk Lee Monaghan, 2002-01-04 Competitor titles are specific to male or female bodybuilding They lack the theoretical conceptual framework of our book and do not focus on the use of steroids and other drugs Exposes a huge underground drug subculture previous studies have only touched on Examines the latest research on the new hot topic of steroid induced violence

Performance Cultures and Doped Bodies Jesper Andreasson, April Henning, 2021-06-30 Why has doping both as a practice and a social phenomenon been approached largely as a question of context sport or fitness Individuals may use substances to enhance sporting performance or within the framework of gym and fitness culture to create a perfect body But clearly people who dope are not bound to a singular context It is quite the opposite as individuals weave between and move across various settings in their trajectories to and from doping as goals identities ambitions and lifestyles change over time Still these stark categorizations often made in public discourse and reinforced by scholars have continued to ignore these lived experiences and limited our understanding of doping Building on data gathered through ethnographic fieldwork studies of online doping communities and in depth case

studies this book embraces the challenge of moving beyond traditional and historical doping dichotomies such as those of sport or fitness online or offline pleasure or harm masculinity or femininity and health or harm and in a sociologically informed analysis it develops new terminology to understand trajectories to and from doping It argues there are multiple ways to understand doped bodies and doping practices and that we must approach these questions from the perspective of both and rather than either or By imploding these divisions it offers updated and nuanced ways of both empirically and theoretically rethinking doping use and experiences attached to the practice

Fitness Doping Jesper Andreasson, Thomas Johansson, 2019-06-25 This book compiles several years of multi faceted qualitative research on fitness doping to provide a fresh insight into how the growing phenomenon intersects with issues of gender body and health in contemporary society Drawing on biographical interviews as well as online and offline ethnography Andreasson and Johansson analyse how in the context of the global development of gym and fitness culture particular doping trajectories are formulated and users come into contact with doping They also explore users internalisation of particular values practices and communications and analyse how this influences understandings of the self health gender and the body as well as tying this into wider beliefs regarding individual freedom and the law This insight into doping goes beyond elite and organised sports and will be of interest to students and scholars across the sociology of sport leisure studies and gender and body politics

Doping in Sport and Fitness April Henning, Jesper Andreasson, 2022-12-12 Doping in Sport and Fitness argues that rigid differentiations between doping contexts are less clear than it might seem Breaking down these boundaries allows for a more complete understanding of substance use patterns behaviours and policy responses related to sport fitness and society
