"An intimate knowledge of the body is crucial for the dancer. This book provides instruction and inspiration that will find a place in the study of dance technique and theory. It should be required reading for all dance students!"

Susan Wallner

"Andrea Olsen's *BodyStories* is a novel book in our field. It is a remarkably poetic introduction to human anatomy. It is an essential book for those who get in touch with your own body, and it is a treasure of poetic poems about the intricate connections between the human body and the nature of complex emotions about the body, makes possible. These inner and outer messages are rich in narrative detail and broad in their articulation, and they create an inspiring dialogue with the more regulatory and instructive parts of the text. The total effect of this unusual creation enhances the pleasure of learning of anatomy, and of personal anatomy. This is a delightful book for anyone who plans to go on living with his or her own body."

BODYSTORIES

A GUIDE TO EXPERIENTIAL ANATOMY

BODYSTORIES is a book which engages the general reader as well as the serious student of anatomy. Its information is applicable to dancers, artists, athletes, bodyworkers, massage therapists, teachers, and individuals with injuries or with a special interest in learning about their body. Thirty-one days of learning sessions bring heightened awareness about each bone and body system as well as providing self-guided studies to activate the learning processes. The book draws on Ms Olsen's twenty years as a dancer and teacher of anatomy to show how our attitudes and approaches to our body affect us day to day. Amusing and insightful personal stories enliven the text and provide ways of working with the body for efficiency and for healing. Anecdotes about international travel as a dancer, and about working with colleagues Bonnie Bainbridge Cohen in experiential anatomy and Janet Adler in Authentic Movement demonstrate how movement patterns and memories are part of our physical heritage, and how the body serves as a language for our world community. The works of twelve visual artists plus children's drawings, medical illustrations and multicultural images are included to broaden our way of looking at and learning to listen to the stories of the body. ♦
