Bogs Baths And Basins The Story Of Domestic Sanitation:

Bogs, Baths and Basins David J Eveleigh,2006-11-15 Covers the early primitive sanitation devices such as cesspits and urban dung heaps From Roman times up to modern day luxury this book leads us chronologically through the story of sanitation It also describes the advances that came with the onslaught of technology from the seventeenth to the twentieth century With first hand accounts and evidence from diaries and contemporary records David Eveleigh traces the history of inventions that have affected everyone throughout history told with a lively combination of human interest and drama

Healing with water Jane M. Adams,2015-05-01 Healing with water provides a medical and social history of English spas and hydropathic centres from the early nineteenth to the mid twentieth centuries It argues that demand for healing rather than leisure drove the growth of a number of inland resorts which became renowned for expertise and treatment facilities These aspects were actively marketed to doctors and patients It assesses the influence of these centres on broader patterns of resort development leisure and sociability in Britain The study explores ideas about water s healing potential and the varied ways it was used to maintain good health and treat a variety of illnesses Water cures were endorsed by both orthodox and unorthodox practitioners and attracted growing numbers of patients into the twentieth century It examines how institutions and skilled workers shaped the development of specialist resorts and considers why the NHS support for spa treatment declined from the 1960s

Bathroom Barbara Penner,2013-11-15 Most of us take modern bathrooms for granted they are an essential part of our homes but we ignore the complex network of pipes pumps and treatment plants that make up indoor plumbing s infrastructure Telling the story of one of the world s greatest feats of engineering and mass production Bathroom follows the room s evolution and the lifestyle it enables Considering how and why the bathroom emerged Barbara Penner describes how it became an international symbol of key modern values such as cleanliness order and progress She explores how colonialism the media fashion world expositions and tourism led to the bathroom being exported across the globe and explains the tensions this process has caused While Penner investigates bidets high tech toilets cast iron bathtubs and walk in showers she also ponders the low tech sustainable alternatives available to us Filled with illustrations Bathroom is an amusing and eye opening cultural history of one of our most used but overlooked rooms

Nails, Noggins and Newels Bill Laws,2006-02-16 Starting at the front door this book takes a look at our homes through different eyes revealing the history of every part from the bricks and beams to pelmets lights and water pipes from wallpaper windows and paints to floors fires and fitted kitchens Crammed with fascinating facts about the everyday bric a brac of the house in which you live Nails Noggins and Newels is written in a lively informal style which will appeal to any DIY enthusiast

The Last Taboo Maggie Black,Ben Fawcett,2010-09-23 Except in schoolboy jokes the subject of human waste is rarely aired We talk about water related diseases when most are sanitation related in short we don t mention the shit A century and a half ago a long hot summer reduced the Thames flowing past the UK Houses of Parliament to a Great Stink thereby inducing MPs to

legislate sanitary reform Today another sanitary reformation is needed one that manages to spread cheaper and simpler systems to people everywhere In the byways of the developing world much is quietly happening on the excretory frontier In 2008 the International Year of Sanitation the authors bring this awkward subject to a wider audience than the world of international filth usually commands They seek the elimination of the Great Distaste so that people without political clout or economic muscle can claim their right to a dignified and hygienic place to go Published with UNICEF Sustainable Water Engineering Ramesha Chandrappa, Diganta B. Das, 2014-06-16 Ensuring safe and plentiful supplies of potable water both now and for future generations and developing sustainable treatment processes for wastewater are among the world's greatest engineering challenges However sustainability requires investment of money time and knowledge Some parts of the world are already working towards this goal but many nations have neither the political will nor the resources to tackle even basic provision and sanitation Combining theory and practice from the developing and developed worlds with high and low tech high and low cost solutions this book discusses fundamental and advanced aspects of water engineering and includes water resource issues including climate change water scarcity economic and financial aspects requirements for sustainable water systems fundamentals of treatment and process design industrial water use and wastewater treatment sustainable effluent disposal sustainable construction principles With integrated theory design and operation specifications for each treatment process this book addresses the extent to which various treatment methods work in theory as well as how cost effective they are in practice It provides a nontechnical guide on how to recover and reuse water from effluent which is suitable for those in water resource management environmental planning civil and chemical engineering *An Archaeology of Institutional Confinement* Peter Davies, Penny Crook, Tim Murray, 2013-09-29 The archaeological assemblage from the Hyde Park Barracks is one of the largest most comprehensive and best preserved collections of artefacts from any 19th century institution in the world Concealed for up to 160 years in the cavities between floorboards and ceilings the assemblage is a unique archaeological record of institutional confinement especially of women The underfloor assemblage dates to the period 1848 to 1886 during which a female Immigration Depot and a Government Asylum for Infirm and Destitute Women occupied the second and third floors of the Barracks Over the years the women discarded and swept beneath the floor thousands of clothing and textile fragments tobacco pipes religious items sewing equipment paper scraps and numerous other objects many of which rarely occur in typical archaeological deposits These items are presented in detail in this book and provide unique insight into the private lives of young female migrants and elderly destitute women most of whom will never be known from historical records *Sanitary Reform in Victorian Britain, Part II vol 5* Michelle Allen-Emerson, Tom Crook, Barbara Leckie, 2021-12-24 Sanitary reform was one of the great debates of the nineteenth century This reset edition makes available a modern edited collection of rare documents specifically addressing sanitary reform Each volume will begin with an introduction and the documents presented have headnotes and endnotes provided A full index appears in the final volume

Healthcare in Private and Public from the Early Modern Period to 2000 Paul Weindling, 2014-12-17 A key volume on a central aspect of the history of medicine and its social relations The History of Healthcare in Public and Private examines how the modernisation of healthcare resulted in a wide variety of changing social arrangements in both public and private spheres This book considers a comprehensive range of topics ranging from children s health mental disorders and the influence of pharmaceutical companies to the systems of twentieth century healthcare in Britain Eastern Europe and South Africa Covering a broad chronological thematic and global scope chapters discuss key themes such as how changing economies have influenced configurations of healthcare how access has varied according to lifecycle ethnicity and wealth and how definitions of public and private have shifted over time Containing illustrations and a general introduction that outlines the key themes discussed in the volume The History of Healthcare in Public and Private is essential reading for any student interested in the history of medicine

A Manufactured Wilderness Abigail Ayres Van Slyck, 2006 Since they were first established in the 1880s children s summer camps have touched the lives of millions of people Although the camping experience has a special place in the popular imagination few scholars have given serious thought to this peculiarly American phenomenon Why were summer camps created What concerns and ideals motivated their founders Whom did they serve How did they change over time What factors influenced their design To answer these and many other questions Abigail A Van Slyck trains an informed eye on the most visible and evocative aspect of camp life its landscape and architecture She argues that summer camps delivered much more than a simple encounter with the natural world Instead she suggests camps provided a man made version of wilderness shaped by middle class anxieties about gender roles class tensions race relations and modernity and its impact on the lives of children Following a fascinating history of summer camps and a wide ranging overview of the factors that led to their creation Van Slyck examines the intersections of the natural landscape with human built forms and social activities In particular she addresses changing attitudes toward such subjects as children s health sanitation play relationships between the sexes Native American culture and evolving ideas about childhood Generously illustrated with period photographs maps plans and promotional images of camps throughout North America A Manufactured Wilderness is the first book to offer a thorough consideration of the summer camp environment
