BOMBER COMMAND

"Bomber Command is a riveting and deeply original story of the bombing campaign against Hitler's Reich, a campaign of unimaginable horror for both the bomber crews and the enemy cities they turned to cinder and ash. It is a classic book, as fresh now as when it first published."

—Donald L. Miller, author of Masters of the Air: America's Bomber Boys Who Fought the Air War Against Nazi Germany

Bomber Command Zenith Military Classics:

Bomber Command Max Hastings, 2013-09-15 This award winning classic of WWII military history chronicles the Royal Air Force's bombing campaign against Germany. RAF Bomber Command's air offensive against the cities of Nazi Germany was one of the most epic campaigns of World War II. The struggle began meekly in 1939 with only a few aircraft: Whitleys, Hampdens and Wellingtons flying blindly through the night on their ill-conceived bombing runs. It ended six years later with 1,600 Lancasters, Halifaxes and Mosquitoes equipped with the best of British wartime technology blazing whole German cities in a single night. In *Bomber Command*, originally published to critical acclaim in the UK, famed British military historian Sir Max Hastings offers a captivating analysis of the strategy and decision making behind one of World War II's most violent episodes. With firsthand descriptions of the experiences of aircrew from 1939 to 1945 based on one hundred interviews with veterans and a harrowing narrative of the experiences of Germans on the ground during the September 1944 bombing of Darmstadt, *Bomber Command* is widely recognized as a classic account of one of the bloodiest campaigns in World War II history. Winner of the Somerset Maugham Prize. Bomber Command Max Hastings Sir, Max Hastings, 2013-09-09

Div Bomber Command is Sir Max Hastings' classic account of one of the most controversial struggles of World War II: the British air offensive against the cities of Nazi Germany. **The 30 Most Influential People of World War II** Alan Axelrod, 2018-06-05 General Patton said: "The soldier is the army." This book says: "People are the war." And even World War II, a conflict of unprecedented scope, magnitude, complexity, and devastation, was the work of individual political leaders, commanders, heroes, and villains. Here are the 30 people who were at the very heart of the world's deadliest and most consequential war, exposed, studied, and ranked according to influence by an author praised as one of America's great military historians.

Torpedo Bombers, 1900-1950 Jean-Denis Lepage, 2020-01-27 The torpedo bomber was a very short-lived weapon system operational for scarcely half a century from just prior to WWI to the 1960s. Yet during its brief existence, it transformed naval warfare, extending the ship-killing range of ships and coastal defenses to hundreds of miles. The Royal Navy and Fleet Air Arm led the way, recording the first sinking of a ship by aerial torpedo in August 1915, but all major navies eagerly developed their own torpedo bomber forces. The torpedo bomber reached its zenith in WWII, particularly from 1940-42, with notable successes at the Battle of Taranto, the sinking of the *Bismarck*, and Pearl Harbor. It was the weapon of choice for both the US and Japanese in the big Pacific battles, such as Midway. In the latter stages of the war, increasingly effective anti-aircraft fire and interceptor aircraft started to render it obsolete, a process completed post-war by long-range anti-ship missiles. Jean-Denis Lepage traces the development of torpedo bombers worldwide, describing their tactics, operational history, and the aircraft themselves, including such well-loved types as the *Swordfish*, *Beaufighter*, and *Avenger*. Over 300 aircraft are beautifully illustrated. *American Book Publishing Record*, 2006. *The Military's Business* Mikkel Vedby Rasmussen, 2015-03-05 Over recent years, Western armed forces have been costing more yet achieving less. Aerial Warfare Frank Ledwidge, 2018 Aerial warfare has dominated western war making for over 100 years and despite regular announcements of its demise it shows no sign of becoming obsolete Frank Ledwidge offers a sweeping look at the history of air warfare introducing the major battles crises and controversies where air power has taken centre stage and the changes in technology and air power capabilities over time Highlighting the role played by air power in the First and Second World Wars he also sheds light on the lesser known theatres where the roles of air forces have been clearly decisive in conflicts in Africa South America and Asia Along the way Ledwidge asks key questions about the roles air power can deliver

and whether it is conceptually different from other forms of combat Considering whether bombing has ever been truly effective he discusses whether wars can be won from the air and concludes by analyzing whether there is a future for manned air power or if it is inevitable that drones will dominate twenty first century war in the air [Air Force Magazine](#),2015-07
