

The image shows the interior of a large, historic building, likely a church, that has been converted into a modern library. The architecture features high, vaulted ceilings with intricate painted designs and large, arched windows. The space is filled with rows of dark wooden bookshelves filled with books. In the foreground, there are long, low tables with books displayed on them. The overall atmosphere is one of a well-lit, spacious, and modern library within a historic setting.

Build On Converted Architecture And Transformed Buildings:

Build-on Robert Klanten, Lukas Feireiss, 2009 Build On is a collection of phenomenal architectural transformations that bring new life and function to existing structures. Exceptional examples of large scale radical renovations and adaptations of industrial wasteland, bunkers, abandoned churches and forsaken rural centres are featured along with creative transformations of smaller building units in the urban and rural context. These overlooked architectural sites are reborn as inhabitable residences, working spaces, art spaces and hotels. This unique collection of inspiring architectonic transformations affirms this sprawling area of innovation and at the same time presents social and cultural interplay between past, present and future.

Contested Spaces, Concerted Projects Cristina F. Colombo, Jacopo Leveratto, 2022-05-18 European cultural heritage is inherently complex and layered. In the past, conflicting or controversial perspectives on different historical memories and experiences have been colliding in the rich cultural landscape of Europe and continue to do so in the present. Contemporary projects of re-activation of contentious spaces seem to challenge both the traditional design parameters and the role of spatial practitioners. They require new strategies that effectively mix top-down and bottom-up impulses through a new design approach that is still in search of a clear definition. Contested Spaces, Concerted Projects collects the stories of some selected cases of difficult built heritage in order to highlight the most innovative methodologies of re-activation by which architects, artists, designers and collectives have developed new participatory public interfaces.
