Building European Spatial Data Infrastructures:

Building European Spatial Data Infrastructures Ian Masser, 2007 Written by one of the world's leading experts on spatial data infrastructures SDIs this book explores existing European SDIs and the efforts of the European Union to create a framework for a multinational Infrastructure for Spatial Information in Europe INSPIRE in order to exploit the many opportunities being created by modern geographic information technologies The institutional and decision making context within which SDIs must be developed requires partnerships between the public and private sectors and concerted government action will play a key role in helping INSPIRE overcome political and institutional barriers The author discusses the steps needed to create a legal framework for the wide ranging project and identifies key strategic issues for future SDI development

Spatial Data Infrastructures in Context Zorica Nedovic-Budic, Joep Cromptoets, Yola Georgiadou, 2011-04-05 In the wake of the so called information technology revolution many stakeholders from the public and private sectors including citizens have indeed grown accustomed to the promise and usability of spatial data infrastructures SDI for data access use and sharing With contributions from international experts this book presents cutting edge Spatial Data Infrastructure SDI research on information technology systems and infrastructures that is theoretically based and empirically supported It examines the complexities involved in the establishments of SDIs in the Northern and Southern hemispheres and use of SDIs in a variety of cultural societal and institutional contexts The focus is on urban and regional levels where socio economic and environmental sustainability is realized

Geographic Information Systems to Spatial Data Infrastructures Ian Masser, 2019-09-25 This book draws on author's wealth of knowledge working on numerous projects across many countries It provides a clear overview of the development of the SDI concept and SDI worldwide implementation and brings a logical chronological approach to the linkage of GIS technology with SDI enabling data The theory and practice approach help understand that SDI development and implementation is very much a social process of learning by doing The author masterfully selects main historical developments and updates them with an analytical perspective promoting informed and responsible use of geographic information and geospatial technologies for the benefit of society from local to global scales Features Subject matter spans thirty years of the development of GIS and SDI Brings a social science perspective into GIS and SDI debates that have been largely dominated by technical considerations Based on a world wide perspective as a result of the author's experience and research in the USA Australia Canada Brazil Peru China India Korea Malaysia and Japan as well as most European countries Draws upon professional and academic experience relating to pioneering UK and European GIS research initiatives Includes updated historical material with an analytical perspective explaining what was done right and what didn't work

Spatial Data Infrastructures at Work Ezra Dessers, 2013-07-04 Spatial data identifies the geographic location of natural and constructed features and boundaries on Earth and has become increasingly important in various administrative practices In order to facilitate access use and sharing

of spatial data among organisations information is brought together in clustered initiatives known as Spatial Data Infrastructures SDIs In Spatial Data Infrastructures at Work Ezra Dessers introduces spatial enablement as a key concept to describe the realisation of SDI objectives in the context of individual public sector processes Drawing on four years of research Dessers argues that it has become essential even unavoidable to manage and re design inter organisational process chains in order to further advance the role of SDIs as an enabling platform for a spatially enabled society Detailed case studies illustrate that the process he describes is the setting in which one can see the SDI at work This book is must read material for academics practitioners and policymakers dealing with sdi and spatial enablement By extension the book will also be of great interest to anyone confronted with societal issues that call for an integrated approach implying in depth cooperation between multiple organisations

Creating Spatial Information Infrastructures Peter van Oosterom, Sisi Zlatanova, 2008-04-23 Initiatives such as INSPIRE and the US DHS Geospatial Data Model are working to develop a rich set of standards that will create harmonized models and themes for the spatial information infrastructure However this is only the first step Semantically meaningful models must still be developed in order to stimulate interoperability Creatin

Developing Spatial Data Infrastructures Ian P. Williamson, Abbas Rajabifard, Mary-Ellen F. Feeney, 2003-07-10 Expert perspectives on SDI theory and practice The spatial data infrastructure SDI concept continues to evolve and become an increasingly important element of the infrastructure that supports economic development environmental management and social stability Because of its dynamic and complex nature however it remains a fuzzy concept

Practical Studies in E-Government Saïd Assar, Imed Boughzala, Isabelle Boydens, 2010-11-17 Information and communication technology ICT is permeating all aspects of service management in the public sector ICT is improving the capacity of government agencies to provide a wide array of innovative services that benefit citizens E Government is emerging as a multidisciplinary field of research based initially on empirical insights from practice Efforts to theoretically anchor the field have opened perspectives from multiple research domains as demonstrated in Practical Studies in E Government In this volume the editors and contributors consider the evolution of the e government field from both practical and research perspectives Featuring in depth case studies of initiatives in eight countries the book deals with such technology oriented issues as interoperability prototyping data quality and advanced interfaces and management oriented issues as e procurement e identification election results verification and information privacy The book features best practices tools for measuring and improving performance and analytical methods for researchers

The Availability of Spatial and Environmental Data in the European Union Katleen Janssen, 2010-01-01 Because the original and essential value of spatial data data that refer to specific geographical locations or areas lies in environmental decision making such data mostly originate in the public sector and are made available to people

European Geographic Information Infrastructures Peter A. Burrough, I. Masser, 2003-05-20 Although it is generally accepted that there is a growing demand for multinational and pan European databases there is little available on the

problems encountered in different types of multinational geographic information applications nor has there been much discussion of the broader legal and constitutional issues involved at the supranational
