Research in Historical Perspective Douglas A. Vakoch, National Aeronautics and Space Administration, 2011-07-06 This book explores some of the contributions of psychology to yesterday's great space race today's orbiter and International Space Station missions and tomorrow's journeys beyond Earth's orbit. It provides an analysis of the challenges facing future space explorers while at the same time presenting new empirical research on topics ranging from simulation studies of commercial spaceflights to the psychological benefits of viewing Earth from space.

Space Physiology Jay C. Buckey Jr., M.D., 2006-02-09 The success of any space flight mission depends not only on advanced technology but also on the health and well-being of crew members. This book, written by an astronaut physician, is the first practical guide to maintaining crew members' health in space. It combines research results with practical advice on such problems as bone loss, kidney stones, muscle wasting, motion sickness, loss of balance, orthostatic intolerance, weight loss, and excessive radiation exposure. Additional topics include pre-flight preparation, relevant gender differences, long duration medical planning, post-flight rehabilitation, and the physiology of extra-vehicular activity. Designed as a handbook for space crews, this text is also an invaluable tool for all the engineers, medical personnel, and scientists who plan and execute space missions.

Psychology of Space Exploration: Contemporary Research in Historical Perspective Douglas A. Vakoch, National Aeronautics and Space Administration, 2012-01-27 Through essays on topics including survival in extreme environments and the multicultural dimensions of exploration, readers will gain an understanding of the psychological challenges that have faced the space program since its earliest days. An engaging read for those interested in space history and psychology alike, this is a highly relevant read as we stand poised on the edge of a new era of spaceflight. Each essay also explicitly addresses the history of the psychology of space exploration.

The volume emphasises non-traditional settings and demonstrates the important role of anthropology in addressing some of the pressing issues facing society today. The contributors offer detailed ethnographic examples from their own research and work that give students valuable insight and advice. Drawn mainly from the United States, the case studies illustrate the diverse arenas in which anthropologists operate, from law and finance to education and health care.
