Buying Military Transformation Technological Innovation And The Defense Industry:

Buying Military Transformation Peter J. Dombrowski, Eugene Gholz, 2006 In *Buying Military Transformation* Peter Dombrowski and Eugene Gholz analyze the United States military's ongoing effort to capitalize on information technology. New ideas about military doctrine derived from comparisons to Internet Age business practices can be implemented only if the military buys technologically innovative weapons systems. *Buying Military Transformation* examines how political and military leaders work with the defense industry to develop the small ships, unmanned aerial vehicles, advanced communications equipment, and systems of systems integration that will enable the new military format. Dombrowski and Gholz's analysis integrates the political relationship between the defense industry and Congress, the bureaucratic relationship between the firms and the military services, and the technical capabilities of different types of businesses. Many government officials and analysts believe that only entrepreneurial start-up firms or leaders in commercial information technology markets can produce the new network-oriented military equipment. But Dombrowski and Gholz find that the existing defense industry will be best able to lead military technology development, even for equipment modeled on the civilian Internet. The U.S. government is already spending billions of dollars each year on its military transformation program, money that could be easily misdirected and wasted if policymakers spend it on the wrong projects or work with the wrong firms. In addition to this practical implication, *Buying Military Transformation* offers key lessons for the theory of revolutions in military affairs. A series of military analysts have argued that major social and economic changes like the shift from the Agricultural Age to the Industrial Age inherently force related changes in the military. *Buying Military Transformation* undermines this technologically determinist claim: commercial innovation does not directly determine military innovation; instead, political leadership and military organizations choose the trajectory of defense investment. Militaries should invest in new technology in response to strategic threats, and military leaders' professional judgments about the equipment needed to improve military effectiveness. Commercial technological progress by itself does not generate an imperative for military transformation. Clear, cogent, and engaging, *Buying Military Transformation* is essential reading for journalists, legislators, policymakers, and scholars.

China's Emergence as a Defense Technological Power Tai Ming Cheung, 2013-10-31 China is flexing its growing military and strategic clout in the pursuit of broadening national security interests At the same time the country's economic and technology policies have also become more nationalistic state centered and ambitious China's defense economy has set its sights on catching up with the West by the beginning of the 2020s and is making steady progress in building up its innovation capabilities although this is presently in the form of incremental and sustaining types of activities More high end disruptive forms of innovation that would lead to major breakthroughs are likely to be beyond China's reach in the near to medium term This volume provides a wide ranging and detailed assessment of the present state of the Chinese defense economy at a time of rapid change and accelerating advancement in its innovation capabilities and performance This collection of articles has three main goals 1 to locate China's defense innovation dynamics within broader historical technological and methodological frameworks of analysis 2 to assess the performance of the Chinese defense economy's six principal subsectors and 3 to compare China's approach to defense industrialization with major counterparts in the Asia Pacific region This book was originally published as a special issue of the Journal of Strategic Studies

Defense Technological Innovation Bharat Rao, Adam J. Harrison, Bala Mulloth, 2020-05-29 Defense Technological Innovation describes the emerging paradigm for innovation at the US Department of Defense and the consequent impacts on its stakeholders Leveraging a combination of prior research archival data first person observations and interviews the authors identify practices and themes characterizing the key trends in defense innovation describe current organizational approaches and practices and develop a theoretical framework that elucidates the competencies required to underwrite defense

innovation objectives The findings therein are relevant to any large technology driven organization contending with the implications of rapid change in the high tech landscape **The Modern Defense Industry** Richard A. Bitzinger, 2009-10-15 Whether it s guns and ammunition or multidimensional anti terrorism systems the defense industry is dynamic complex and ubiquitous It is also mysterious powerful and controversial involving thousands of players worldwide from suppliers and producers to government and military procurers to shadowy figures that trade in the black market This comprehensive two volume reference will explore on a global scale the various issues concepts problems and controversies surrounding the rise of the modern defense industry Unparalleled in its scope and insight The Modern Defense Industry will prove invaluable to the industry s critics and champions alike The phenomenon of a more or less permanent defense industry especially one so wide in scale breadth air sea land and space technology and geography is still relatively new Until now its implications for politics economics and technology have not been adequately discussed in an authoritative accessible format for scholars and researchers business people journalists policymakers and interested laymen The Modern Defense Industry addresses the period from 1945 to the present covering the United States Europe Russia China Israel and other important arms producing and arms procuring countries Including essays by experts from around the world a glossary data on firms and governments laws and policies primary documents case studies and a host of other elements this set will be a unique resource for anyone interested in the arms industry It will also offer penetrating insights into topics like international relations and diplomacy arms proliferation and contemporary politics Volume I comprises chapters by experts in the field on topics like the relationship between the industry military and government how new modes of warfare are changing the industry the implications of globalization on the industry the black and gray areas of the arms trade and much more Volume II features an extensive A Z glossary of terms lists of defense firms and government agencies annotated primary documents lists of leading defense contractors and key weapons systems an analysis of key legislation and professional organizations The Modern Defense Industry sets the standard for state of the art overviews of an industry that has for better or worse come to infuse nearly every aspect of world affairs in the early twenty first century US Defense Politics Harvey M. Sapolsky, Eugene Gholz, Caitlin Talmadge, 2013-12-04 This textbook provides an accessible overview of US defense politics for upper level students This new edition has been fully updated and revised with a new chapter on intelligence and new material on unmanned drones women in the military the Tea Party and other key issues Analyzing the ways in which the United States prepares for war the authors demonstrate how political and organizational interests determine US defense policy and warn against over emphasis on planning centralization and technocracy Emphasizing the process of defense policy making rather than just the outcomes of that process US Defense Politics departs from the traditional style of many existing textbooks Designed to help students understand the practical side of American national security policy the book examines the following key themes US grand strategy who joins America s military how and why weapons are bought the management of defense

public attitudes toward the military and casualties the roles of the President and the Congress in controlling the military the effects of 9 11 and the Global War on Terror on security policy homeland security government reorganizations and intra and inter service relations The textbook will be essential reading for students of US defense politics US national security policy and homeland security and highly recommended for students of US foreign policy US public policy and public administration

Brooks, William C. Wohlforth, 2016-07-26 A decade and a half of exhausting wars punishing economic setbacks and fast rising rivals has called into question America s fundamental position and purpose in world politics Will the US continue to be the only superpower in the international system Should it continue advancing the world shaping grand strategy it has followed since the Cold War Or

should it focus on internal problems America Abroad takes stock of these debates and provides a powerful defense of American globalism Since the end of World War Two world politics has been shaped by two constants America s position as the most powerful state and its strategic choice to be deeply engaged in the world But if America disengages from the world and reduces its footprint overseas core US security and economic interests would be jeopardized While America should remain globally engaged it has to focus primarily on its core interests or run the risk of overextension A bracing rejoinder to the critics of American globalism a more potent force than ever in the Trump era America Abroad is a powerful reminder that a robust American presence is crucial for maintaining world order
