many years may have passed Another story that is often thought about with elephants is Are they afraid of mice You might have heard that elephants fear mice because they can run up the elephant s trunk But the answer here is that this story is not true and there is no proof of any kind to support this It may not surprise you know that the elephants of today are related to the Ice Age Mammoth At one time there were over 350 different species of elephants yet today we have only two species left Can you name the two species What you may be surprised to learn is that elephants were not always the large creatures you see today In fact in prehistoric times the elephant was as small as the size of a cow or pig Would it surprise you to learn that the elephants of today are related to the sea cow known as the Manatee Did you know that when the elephants flap their ears they do it for a reason Or do you know what jobs the elephants use their tusks for An elephant s tusk can be smaller on one side than the other Do you know the reason why Did you know that a female elephant will spend her whole life in one herd while the male elephant usually live their lives alone sometime after the age of 14 As you can see there are many interesting things that can be learned about this tremendous sized animal with the ivory tusks
