

5. **VISUAL ANALOGY** In the visual analogy of the growing town, what does the library represent? Identify two characteristics that make it a good choice for this analogy.

SAMPLE ANSWER: The library represents the cell's DNA. It is a good choice because a library contains information and typically there is only one per small town.

Cell Division and Reproduction

For Questions 6–8, complete each statement by writing the correct word or words.

6. **Reproduction** is the formation of new individuals.
7. For single-celled organisms, cell division is a form of asexual reproduction.
8. Most multicellular organisms reproduce by sexual reproduction.
9. Use the table to compare and contrast asexual and sexual reproduction.

Asexual and Sexual Reproduction	
Similarities	Differences
Both produce new organisms. Both involve the transfer of genetic material from parent to offspring.	The offspring of asexual reproduction are genetically identical to their parents. The offspring of sexual reproduction have some genetic information from each parent. In asexual reproduction, cells separate to form a new individual. In sexual reproduction, two cells fuse.

Apply the Big Idea

10. Vascular tissue helps plants transport water against the force of gravity. Because of this, plants that lack vascular tissue do not grow very tall. How is this situation similar to the information you have learned in this lesson? Explain.

SAMPLE ANSWER: Plants that lack vascular tissue cannot grow very tall because they cannot transport water very far. A cell cannot grow very large because if it did, it would be unable to transport needed materials into the cell and transport wastes out.
