Intelligence Analysis in the Digital Age Stig Stenslie, Lars Haugom, Brigt H. Vaage, 2021-08-05 This book examines intelligence analysis in the digital age and demonstrates how intelligence has entered a new era While intelligence is an ancient activity the digital age is a relatively new phenomenon This volume uses the concept of the digital age to highlight the increased change complexity and pace of information that is now circulated as new technology has reduced the time it takes to spread news to almost nothing These factors mean that decision makers face an increasingly challenging threat environment which in turn increases the demand for timely relevant and reliable intelligence to support policymaking In this context the book demonstrates that intelligence places greater demands on analysis work as the traditional intelligence cycle is no longer adequate as a process description In the digital age it is not enough to accumulate as much information as possible to gain a better understanding of the world To meet customers needs the intelligence process must be centred around the analysis work which in turn has increased the demand for analysts Assessments not least predictions are now just as important as revealing someone else s secrets This volume will be of much interest to students of intelligence studies security studies and international relations

of experience in intelligence with both philosophical theory and experimental research the author proposes an alternative approach to mitigating cognitive bias that focuses on creating the optimum environment for analysis challenging current leading theories US Intelligence Failure and Knowledge Creation Carl W. Ford, Jr., Kathleen M. Vogel, 2025-10-16 This book examines the roots and elements of the research and knowledge generation problems in US intelligence The work identifies the crux of the problem as the lack of a research capability in US intelligence which has developed over the past 40 years due to a variety of organizational decisions that prioritized current intelligence reporting and a focus on structural solutions to fix intelligence failures The book argues that this is the principal cause of recent major intelligence failures regarding 9 11 the 2003 Iraq War and the current Russia Ukraine War Throughout the book the authors aim to provide short medium and long term policy relevant recommendations to intelligence officials and members of the US Congress in the form of workforce leadership and organizational changes that can be implemented to address existing research shortcomings in intelligence analysis The book s conclusions will also be relevant to the intelligence agencies of other countries This book will be of much interest to students of intelligence studies national security US politics defense studies and international relations
