

Dissociative Identity Disorder - Treatment Routes

Integrated functioning is the goal of treatment for DID.

"A desirable treatment outcome is a workable form of integration or harmony among alternate identities."

Cooperative arrangement between alters/parts

Sufficiently integrated and coordinated functioning among alternate identities to promote optimal functioning.

Partial integration

Fusion plus cooperative functioning

Fusion - some alters/parts join together, no sense of separateness between them. All alters/parts function in a cooperative & coordinated way.

Final Fusion

(complete integration)

- Complete merger and loss of separateness of all alters/parts
- Most stable treatment outcome
- Many DID patients won't achieve this and/or won't find it desirable

The terms Integration and Fusion can be used in confusing ways.

Integration is a broad process referring to ALL work on dissociated processes during treatment.

Fusion refers to a point in time when two or more alters/parts join together with a complete loss of subjective separateness.

Final fusion refers to the point in time when the patient's sense of self shifts from that of having multiple identities to that of being a unified self.

Moline, 2012-10-04 The diagnosis of dissociative identity disorder, formerly known as multiple personality disorder, remains controversial despite its inclusion as an established diagnosis in psychiatry's Diagnostic and Statistical Manual (DSM-IV). This book consists first of the detailed description of the treatment of a patient whose syndrome of DID emerged in the course of therapy by a psychoanalyst who entered into the therapy as a complete skeptic. The therapist's willingness to explore the meaning and reality of the dramatic and at times bizarre presentation of this disorder in a prolonged and difficult treatment was accompanied by an eventual successful outcome. Using this case as a reference point, the author then provides a contemporary exploration of the literature about the authenticity of this diagnosis and approaches to its treatment.
