Ancient Greek Architects at Work J. J. Coulton, 1982 ***Greek Architects at Work*** J. J. Coulton, 1977 *Ancient Greek Architects at Work* J. J. Coulton, 1988 ***Ancient Greek Architects at Work*** John J. Coulton, 1977 *Ancient Greek Architects at Work* J. J. Coulton, 1982 Taking an unusual approach to his subject J J Coulton examines ancient Greek architecture from the point of view of the practicing architects He discusses their ideas and technical achievements from the early seventh century B C to the first century B C Drawing on surviving written evidence from antiquity as well as on the evidence of the buildings themselves Mr Coulton provides answers to such questions as What must it have been like to build a Greek temple Who did the building What training was required How did the Greeks begin What problems did they face The first chapter considers the relations of architects to patrons and clients and the role of architects in ancient society generally Subsequent chapters explore a series of architectural problems and their solutions In his final chapter Mr Coulton assesses the architects techniques and their contributions to structural design evaluating their theoretical knowledge of mechanics and their practical understanding of structural concepts Generously illustrated and lucidly written this volume will appeal to all who are interested in architecture architectural history and archaeology *The Mechanical Hypothesis in Ancient Greek Natural Philosophy* Sylvia Berryman, 2009-08-06 It has long been thought that the ancient Greeks did not take mechanics seriously as part of the workings of nature and that therefore their natural philosophy was both primitive and marginal In this book Sylvia Berryman challenges that assumption arguing that the idea that the world works like a machine can be found in ancient Greek thought predating the early modern philosophy with which it is most closely associated Her discussion ranges over topics including balancing and equilibrium lifting water sphere making and models of the heavens and ancient Greek pneumatic theory with detailed analysis of thinkers such as Aristotle Archimedes and Hero of Alexandria Her book shows scholars of ancient Greek philosophy why it is necessary to pay attention to mechanics and shows historians of science why the differences between ancient and modern reactions to mechanics are not as great as was generally thought

World Architecture Richard Ingersoll, 2019 World Architecture provides the most comprehensive and contemporary survey of the field Each chapter is organized chronologically and focuses on three unique architectural cultures simultaneously providing instructors with flexibility and offering students a comprehensive method for understanding and appreciating the history cultural significance beauty and diversity of architecture from around the world ***The Spartan Way*** Nic Fields, 2013-02-28 One of the best books about the ancient world I've ever read lively and informative Toy Solder Model Figure For a period of some 200 years Sparta was acknowledged throughout the Greek world as the home of the finest

soldiers Xenophon called them the only true craftsmen in matters of war In this book Nic Fields explains the reasons for this superiority how their reputation for invincibility was earned and deliberately manipulated and how it was ultimately shattered The Spartan Way examines how Spartan society through its rigid laws and brutal educational system was thoroughly militarized and devoted to producing warriors suited to the intense demands of hoplite warfare professional killers inculcated with the values of unwavering obedience and a willingness to fight and die for their city The role of Spartan women as mothers and wives in shaping the warrior ethic is considered as are the role of uniform and rigorous training in enhancing the small unit cohesion within the phalanx and the psychological intimidation of the enemy The final chapters chart the course of Sparta's successes through the period of the Persian and Peloponnesian Wars through the Corinthian and Theban wars of the fourth century BC which culminated with the shattering military defeats at Leuctra and 2nd Mantinea and the years of her decline with the Spartans as a source of mercenaries for the wars of other states Includes maps
