In this lab activity you will be using glassware, which may break if dropped, so please handle equipment with care.

BACKGROUND:

As a biology student, you will often be asked to make observations. These observations will be of either a qualitative or quantitative nature. A qualitative observation is a descriptive representation of a characteristic and is not numerical. Quantitative observations are numerical. For example, if you were studying rainfall in Florida and wanted to determine which city had the most rainfall last year, you could provide a quantitative description, e.g. 52 inches.
