Beyond Quality in Early Childhood Education and Care Gunilla Dahlberg, Peter Moss, Alan Pence, 2013-10-23 Taking a broad approach *Beyond Quality in Early Childhood Education and Care* relates issues of early childhood to the sociology of childhood philosophy ethics political science and other fields and to an analysis of the world we live in today It places these issues in a global context and draws on work from Canada Sweden and Italy including the world famous nurseries in Reggio Emilia Working with postmodern ideas this book questions the search to define and measure quality in the early childhood field and its tendency to reduce philosophical issues of value to purely technical and managerial issues of expert knowledge and measurement With a brand new Preface to this classic text the authors argue that there are other ways than the discourse of quality for understanding and evaluating early childhood pedagogical work and relate these to alternative ways of understanding early childhood itself and the purposes of early childhood institutions

Beyond the Innocence of Childhood David Adams, Eleanor Deveau, 2020-11-25 Death is not a mere possibility but a certainty for all of us Yet today's society unrealistically portrays childhood as a time of unremittant joy and freedom Unfortunately the reality of life may suddenly bring children face to face with tragic circumstances such as the death of their pet the terminal illness of their parent their own struggle with life threatening disease the accidental death of their sibling or the suicide of a friend The gravity of any of these situations takes children beyond the innocence of childhood and plunges them into a world that is frightening and full of uncertainty Unfortunately our perceptions and attitudes toward death do not equip children with the tools to help them cope adequately with such overwhelming experiences *Beyond the Innocence of Childhood* is a collection of forty chapters which are divided into three separate volumes The overall purpose of this series is to answer the question How do we as educators clinicians other professionals and parents help children and adolescents deal with threat to their lives dying death and bereavement In this three volume set the editors have brought

together a number of well known educators researchers and practitioners who share their knowledge and expertise concerning the care and well being of children and adolescents

SPECIFIC TO VOLUME 1 Children explore the world around them through spontaneous and later structured learning acquire knowledge learn to understand themselves establish their role in the family develop peer and adult relationships and find their place in the world However today s society does not include death as part of this developmental process Unfortunately such avoidance may negatively influence children s ability to acquire an understanding of the concepts of death and to develop positive attitudes toward death Highlights of this section include Answering children s questions Children and death past present and future Gender differences Teachable moments Perceptions of death cognitive development and children s artwork The second part of volume 1 examines influences in today s society that potentially impact on children and adolescents perceptions and attitudes toward life threatening illness and death This volume offers readers valuable insights into the various factors which ultimately affect children s ability to achieve a mature understanding of death Features include the following Violent death in a popular culture and the media Political conflict and war The epidemic of AIDS Cultural differences in the management of life threatening illness Death rituals and funeral ceremonies

Beyond the Century of the Child Willem Koops, Michael Zuckerman, 2012-10-30 In 1900 Ellen Key wrote the international bestseller *The Century of the Child* In this enormously influential book she proposed that the world s children should be the central work of society during the twentieth century Although she never thought that her century of the child would become a reality in fact it had much more resonance than she could have imagined The idea of the child as a product of a protective and coddling society has given rise to major theories and arguments since Key s time For the past half century the study of the child has been dominated by two towering figures the psychologist Jean Piaget and the historian Philippe Ari s Interest in the subject has been driven in large measure by Ari s s argument that adults failed even to have a concept of childhood before the thirteenth century and that from the thirteenth century to the seventeenth there was an increasing childishness in the representations of children and an increasing separation between the adult world and that of the child Piaget proposed that children s logic and modes of thinking are entirely different from those of adults In the twentieth century this distance between the spheres of children and adults made possible the distinctive study of child development and also specific legislation to protect children from exploitation abuse and neglect Recent students of childhood have challenged the ideas those titans promoted they ask whether the distancing process has gone too far and has begun to reverse itself In a series of essays *Beyond the Century of the Child* considers the history of childhood from the Middle Ages to modern times from America and Europe to China and Japan bringing together leading psychologists and historians to question whether we unnecessarily infantilized children and unwittingly created a detrimental wall between the worlds of children and adults Together these scholars address the question whether a hundred years after Ellen Key wrote her international sensation the century of the child has in fact come to an end
