Brooks D.H. Melhem, 2014-07-11 Gwendolyn Brooks is one of the major American poets of this century and the first black woman to win the Pulitzer Prize for poetry 1950 Yet far less critical attention has focused on her work than on that of her peers In this comprehensive biocritical study Melhem herself a poet and critic traces the development of Brooks s poetry over four decades from such early works as *A Street in Bronzeville* *Annie Allen* and *The Bean Eaters* to the more recent *In the Mecca* *Riot* and *To Disembark* In addition to analyzing the poetic devices used Melhem examines the biographical historical and literary contexts of Brooks s poetry her upbringing and education her political involvement in the struggle for civil rights her efforts on behalf of young black poets her role as a teacher and her influence on black letters Among the many sources examined are such revealing documents as Brooks s correspondence with her editor of twenty years and with other writers and critics From Melhem s illuminating study emerges a picture of the poet as prophet Brooks s work she shows is consciously charged with the quest for emancipation and leadership for black unity and pride At the same time Brooks is seen as one of the preeminent American poets of this century influencing both African American letters and American literature generally This important book is an indispensable guide to the work of a consummate poet *The Moment* Carl A. Grant, Shelby J. Grant, 2012-10-26 In 2008 a media firestorm erupted when snippets of Reverend Jeremiah Wright Jr s

sermons were picked up by media outlets around the world At that time presidential candidate Barack Obama was a member of Wright s church Trinity United Church of Christ in Chicago Wright s words were frequently used to question the patriotism of Obama The scrutiny over Obama and Wright s relationship made Trinity UCC a flashpoint in the 2008 campaign The Moment tells the inside story of Trinity UCC during this time of turmoil Carl and Shelby Grant describe the Moment as it unfolded from Wright s first appearances in the media to Obama s resignation from Trinity Church They also provide helpful background information including general history of the black church African American immigration to Chicago and black politics in the Windy City In this context the voices of Trinity UCC members come alive to show the impact of the Moment within and beyond the presidential election illustrating the thorny intersections of religion race politics and the media in the United States

The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
