Mixing a Musical Shannon Slaton, 2012-11-12 When mixing a live show for the first time or hundredth time there are countless things running through your mind foremost this is live and you have to get it right Whether you are working on Broadway in a regional theatre or on the school production having an understanding of the equipment set up and how sound behaves is crucial to the success of your show's performance In this guide to live sound mixing for theatre Shannon Slaton shares his expert knowledge and proven effective techniques acquired from years of experience working on Broadway shows Written in a clear and easy to read style and illustrated with real world examples of personal experience and professional interviews Slaton shows you how to mix live theatre shows from the basics of equipment set ups and using sound levels to creating atmosphere emotion and tension to ensure a first rate performance every time

Stage Lighting Richard E. Dunham, 2015-10-30 The book's organization follows a layered approach that builds on basic principles Light as a Medium Part 1 Tools of a Lighting Designer Part 2 Design Fundamentals Part 3 and Lighting Applications Part 4 This presents students with a practical and logical sequence when learning basic concepts The full spectrum of the lighting design process is presented in detail giving students an example of how one might develop a lighting

design from script analysis through concept and plot development and all the way to an opening. This detailed process with a step by step design approach gives students a plan to work from which they can later modify as they mature and gain confidence as designers. The text contains a more comprehensive discussion of basic technology, light as a physical phenomena and methodology of designs than is found in most introductory texts, bridging the gap between introductory and advanced lighting courses. The text will appeal to theatrical designers who want to venture into areas of lighting like architectural or virtual lighting design while at the same time gaining a solid grounding in the fundamentals of lighting design. Lighting Design will also benefit illuminating engineers who want to move away from mere computational approaches in lighting and on to explore techniques along the design approaches of theatrical lighting design. The final 9 chapters cover many specialty areas of lighting design, highlighting the unique and shared qualities that exist between the different aspects of these elements. Discussions involve traditional entertainment areas like theatre as well as lesser known facets of the industry including film, video, landscape lighting, retail, museum lighting, virtual lighting, concert, spectacle performances and architectural lighting. Models of design tasks demonstrate the actual use and development of plots, sections, schedules, photometrics tables and cut sheets rather than simply talking about what they are. This hands on approach provides students with a firm understanding of how to actually use these tools and processes.

The Assistant Lighting Designer's Toolkit Anne E. McMills, 2014-07-25. What are the do's and don'ts of being a good assistant lighting designer? What are focus tapes and how do I use them? What is the best method for creating a magic sheet? What should be found in every assistant's kit? How do I make that first important leap into this professional career? Answer these questions and many more with *The Assistant Lighting Designer's Toolkit*. This definitive guide unlocks the insider secrets used to succeed as a professional assistant lighting designer (ALD), whether choosing assisting as a career or while transitioning to another. This book outlines step by step the challenges the ALD faces during every phase of production. Never before has a resource existed that views the design process through the eyes of the assistant. Intermingled among the nuts and bolts of the paperwork and essential procedures, top industry professionals reveal tips for personal survival in this challenging career, both domestically and abroad, as well as in other careers in lighting. Within these pages are the industry secrets rarely taught in school. The author's website can be found at <http://www.aldtoolkit.com>.

The Lighting Supervisor's Toolkit Jason E. Weber, 2020-12-29. *The Lighting Supervisor's Toolkit* guides readers through the Lighting Supervisor's production process with an emphasis on the importance of the collaborative nature of the role. Lifting the veil on a process regularly learned on the job, this book offers a deeper understanding of the role of Lighting Supervisor and how to take lighting designs from dreams to reality. Readers will learn to communicate with designers, analyze drawings, plan installations, document decisions, supervise crews and innovate out of the box solutions. Providing guidance for technically focused individuals seeking deeper understanding of the profession, *The Lighting Supervisor's Toolkit* is ideal for students and professional technicians looking to take on important

leadership roles in theatrical and entertainment lighting
