

KENWOOD CHEF MODELS A701, A701A & ATTACHMENTS

General Description

The Kenwood Chef is a free standing food preparation machine, for which a range of attachments is manufactured. Power is provided by a series wound motor, the speed of which is varied by a controller assembly. Radio and television suppression components are fitted. The machine has four power outlets, three through a gear box, and the fourth a high speed outlet which is a direct drive from the armature shaft of the motor. Removal of the high speed outlet cover automatically disconnects the drive from the motor to the gear box.

The motor and the gearbox are encased by a stove enamelled aluminium casting.

The head of the machine is hinged and a spring and push button quadrant lock assembly allows it to be opened and closed with one hand. The machine is double insulated and does not require to be earthed.

The models A701 and A701A differ in the method employed to secure the attachments to the Planetary drive.

The model A701 has a spring loaded beater release ring, which when rotated allows the shaft of the attachment to be inserted into the housing. A recess in the top of the attachment drive shaft engages with a pin in the housing and when the ring is released, the spring engages into a recess in the shaft to secure it.

The model A701A planet hub is designed to accept a beater shaft with a drive pin and circlip form of fixing which enables attachments to be fitted with a push-in action.

Attachments designed to be driven by the planet hub are peculiar to each model e.g. 'K' Beater, Whisk, Dough Hook, Potato Peeler and Colander & Sieve. All other attachments designed to be driven by the slow speed outlet, high speed outlet and Juice Extractor outlet can be used with either model.
