Justice in the 21st Century (4th Edition) Laura J. Moriarty, 2025-03-26 The fourth edition of Criminal Justice Technology in the 21st Century comes just about five years after the COVID 19 pandemic when technology took a more prominent role in our everyday lives and more importantly in the criminal justice system Ideas that once were mere thoughts from academics pondering the future have become everyday realities While most areas of life came to a standstill as the pandemic ensued the criminal justice system could not stop Crime adapts more seamlessly than other aspects of society and as such the criminal justice system needed to adapt as well The contributing authors were asked to consider the pandemic and its impact on evolving technology and advancements to address crime Likewise other societal concerns focusing on law enforcement and its questionable use of force at times have escalated the need for technology to ensure that over policing in minority neighborhoods and accountability is established or not to deescalate violence whether police brutality or protester police violence The impact of technology remains to be seen but there is real hope that such technology can begin to shed light on what is happening in these volatile situations Either the current contributors have updated their chapters from the Third Edition or there are new contributors focusing on the abovementioned issues This fourth edition with more than 20 contributors highlights the most current thinking about criminal justice technology The book is longer than the previous editions but has fewer chapters This is the result of paring down what is included in this new edition The hope is that these chapters will be the most relevant and useful to both the expert and the neophyte Criminal justice technology will continue to advance and we must keep abreast of new trends Brodie's BOMBS AND BOMBINGS Jim Smith, 2015-11-23 Bombs and

Bombings is the definitive text regarding the construction of bombs and the motivation for bombings in the U S Although some law enforcement sensitive material is excluded from this book it still presents a thorough understanding of why bombs and bombings remain a constant threat The chemistry of explosives and how such affects the performance of explosives are an essential part of the text The reader is taken through a short course on explosive engineering and the chemistry of explosives A brief history of bombings provides insight as to how improvised explosive devices were used to shape history and how the situations of the early 1900s are repeating themselves today While many believe that suicide bombings are something seen only in the Middle East this text explores the suicide bombings in the U S and the motivation of the bombers

Various profiles of several famous bombers such as the Unabomber and the Mad Bomber are reviewed along with other psychological issues that might inspire bombers The use of bombs to disperse radioactive materials in the radiation dispersion device configuration is addressed along with the technique used to disperse chemical and biological agents with explosives Booby traps especially those targeting law enforcement are explained and methods to detect booby traps are developed to allow a rudimentary understanding of the process Methods to identify clandestine laboratories manufacturing explosives or other drugs such as methamphetamine are identified providing the reader with an understanding of the items to identify and differentiate the types of laboratories Numerous bombings are examined providing an insight as to why and how the attacks were successful Mitigation techniques such as using alcohol resistant aqueous film forming foam to suppress blast and fragment formation are explained along with deployment methods The text is richly illustrated with photographs depicting IEDs explosives and booby traps to assist in the identification of suspicious objects suspect packages or potential mail bombs The book provides an overview that those involved in law enforcement security and counterterrorism will find elucidating and beneficial in bomb related operations and mitigation efforts **LEADING COPS** Gerald W.
