Novel Technologies in the Diagnosis and Management of Sleep-Disordered Breathing, volume II Ding Zou, Henri Korkalainen,2025-10-31 Sleep disordered breathing SDB ranging from habitual snoring to severe obstructive sleep apnea

OSA is highly prevalent and represents a growing global healthcare burden. Besides disrupting sleep, SDB leads to detrimental outcomes such as excessive daytime sleepiness, neurocognitive impairment, and increased cardiometabolic morbidities. In the Research Topic Volume I, we observed the technology developments that enable rapid innovations in the field of SDB. Simple diagnostic methods and novel disease management solutions strongly suggest that the SDB diagnostic and management are moving from a one-size-fits-all approach to precision sleep medicine. To build on the success of Volume I, presenting outstanding works in the field, the Volume II aims to expand on the recent developments in the field of sleep medicine. Possible topics of interest include but are not limited to:

1. Novel insights on pathophysiology mechanisms of OSA from physiological signals collected from standard sleep studies
2. Novel signal acquisition and sensor technologies
3. Alternative polysomnography metrics and analyses
4. Minimally invasive data collection for screening and long-term follow-up of SDB
5. Artificial intelligence and machine learning based signal analysis approach
6. Biomarkers and phenotyping based prediction models on treatment outcomes
7. Big data approaches and telemedicine in sleep medicine
8. Emerging technologies to provide alternative treatment options for better treatment adherence and clinical outcomes
9. Disease management approaches encompass phenotyping and endotyping for better patient characterization, including disease severity, daytime symptoms, as well as comorbidity conditions
10. Patient-reported outcome measures assessment and sleep disparities studies

We are interested in original works, protocols, literature reviews, meta-analyses, perspectives, and expert consensus related to sleep disorders with a specific focus on SDB.
