Parts of a Manuscript

- Use headings and subheadings to break up text and organize information in a logical progression. Avoid abbreviations and citing references, figures, or tables in headings and subheadings. Maintain a consistent style and typeface for each level.
- **Abstracts** should summarize the main point(s) of an article and include the objective, methods, results, and conclusions of a study.
 - **Addenda** are materials added to an article after it has been published or accepted for publication. An addendum may be incorporated directly into the text or at the very end of the article.
 - **Acknowledgements** are located between the body of the text and the references. They contain information about the publication, contributors, financial disclosure, funding/support, sponsors, and disclosures.

Ethical & Legal Considerations

- Use ethical practices when preparing materials for publication. Medical and scientific content is often regulated by ethical and legal standards.
- **Authorship:** The names of people who participate in the creation of a document, theory/idea, or study who have the right to take public responsibility for their contribution. Names of authors and contributors must be noted in the publication.

- Confidentiality must be protected in published work. Personal identifiers (i.e., names, dates of birth) of case study or clinical research participants must never be used without authorization from the individuals. Patients have rights to anonymity and privacy.
- **Copyright:** Published materials may be subject to copyright laws. Intellectual property, such as data or the theories and findings of researchers, is protected under copyright laws. Authors and editors may need to obtain the rights to publish materials that are copyrighted.
