Archaeology for Today and Tomorrow Craig N Cipolla, Rachel J Crellin, Oliver J T Harris, 2023-12-04 Archaeology for Today and Tomorrow explores how cutting edge archaeological theories have implications not only for how we study the past but also how we think about and prepare for the future Ranging from how we understand migration or political leadership to how we think about violence or ecological crisis the book argues that archaeology should embrace a future oriented attitude Behind the traditional archaeological gaze on the past is a unique and useful collection of skills tools and orientations for rethinking the present and future Further it asserts that archaeological theory is not only vital for how we conduct our work as archaeologists and how we create narratives about the past but also for how we think about the broader world in the present and crucially how we envision and shape the future Each of the chapters in the book links theoretical approaches and global archaeological case studies to a specific contemporary issue It examines such issues as human movement violence human and non human relations the Anthropocene and fake news to showcase the critical contributions that archaeology and archaeological theory can make to shaping the world of tomorrow An ideal book for courses on archaeology in the modern world and public archaeology it will also appeal to archaeology students and researchers in general and all those in related disciplines interested in areas of critical contemporary concern **And No Birds Sing** Craig Waddell, 2000 Craig Waddell presents essays investigating Rachel Carson s influential 1962 book *Silent Spring* In his foreword Paul Brooks Carson s editor at Houghton Mifflin describes the process that resulted in *Silent Spring* In an afterword Linda Lear Carson s recent biographer recalls the end of Carson s life and outlines the attention that Carson s book and Carson herself received from scholars and biographers attention that focused so minutely on her life that it detracted from a focus on her work The foreword by Brooks and the afterword by Lear frame this exploration within the context of Carson s life and work Contributors are Edward P J Corbett Carol B Gartner Cheryll Glotfelty Randy Harris M Jimmie Killingsworth Linda Lear Ralph H Lutts Christine Oravec Jacqueline S Palmer Markus J Peterson Tarla Rai Peterson and Craig Waddell Together these essays explore *Silent Spring* s effectiveness in conveying its disturbing message and the rhetorical strategies that helped create its wide influence **Archaeology Today, Tomorrow** Tyrone Georgiou, 1990 **Shadow Archaeologies** Assaf Nativ, Gavin Lucas, 2025-07-31 *Shadow Archaeologies* explores the modes of knowledge production which operate where the light of mainstream historically oriented archaeology does not reach It exposes the field s underbelly and dwells on issues that standard practice ignores or glosses over questioning what archaeology and the archaeological are or could be The volume brings together scholars working at the discipline s theoretical cutting edge to challenge mainstream archaeology in various ways They engage with the political dimensions of the discipline s mode of production develop alternate practices and conceive of other manifestations of the archaeological object thus illuminating various ways in which the concept of

shadow archaeology can be articulated After an introduction by the editors the volume is organised into three parts which address from different angles the politics practices and objects of an archaeology that resides in the shadow of antiquity While the book will appeal to any archaeologist with an interest in theory it is also a challenge to all archaeologists to reflect on their discipline and their own working practices and an invitation to join in the discussion about what archaeology might become

Archaeological Situations Gavin Lucas, 2022-09-02 This book is an introduction to theory in archaeology but with a difference Archaeological Situations avoids talking about theory as if it was something you apply but rather as something embedded in archaeological practice from the start Rather than see theory as something worked from the outside in this book explores theory from the inside out which means it focuses on specific archaeological practices rather than specific theories It starts from the kinds of situations that students find themselves in and learn about in other archaeology courses avoiding the gap between practice and theory from the very beginning It shows students the theoretical implications of almost everything they engage in as archaeologists from fieldwork recording writing up and making and assessing an argument to exploring the very nature of archaeology and justifying its relevance Essentially it adopts a structure which attempts to pre-empt one of the most common complaints of students taking theory courses how is this applicable Aimed primarily at undergraduates this book is the ideal way to engage students with archaeological theory

Archaeological Approaches to Cultural Identity S. J. Shennan, 2003-05-20 Examines the critical implications of cultural identity from a variety of perspectives Questions the nature and limits of archaeological knowledge of the past and the relationship of material culture to cultural identity

Archaeology Barry W. Cunliffe, Wendy Davies, Colin Renfrew, 2002 Twenty six leading scholars from around the world have come together to celebrate the strengths the energies and the sheer intellectual excitement of their discipline They unashamedly proclaim that over the last hundred years archaeology has transformed itself from a genteel antiquarian pursuit deeply rooted in the classical tradition to a rigorous and demanding discipline spanning the humanities and the sciences yet at the same time one widely accessible to the public at large The contributors show how our understanding of the past has changed reveal the exciting ideas under current debate and offer their visions of the future The result is a remarkable overview of world archaeology focusing on new and unexpected themes at the cutting edge of the discipline
