Architectural Tourism Building For Urban Travel Destinations:

Architectural Tourism Jan Specht, 2014-05-19 Since the early times of travelling architecture does constitute an important force of attraction and a vital element in marketing. Until today destinations try to increase their market positions by means of the development and restoration of the built environment. However architecture is characterised by an enduring presence with impacts on visitors and residents alike. Hence on a sustainable basis it needs to chime with place and situation. Where modesty might be suitable for one destination, spectacular architecture could be a transformation catalyst or unique selling proposition for another. Destination developers have to be aware of the local requirements as well as the reciprocal relationship between the modern practice of tourism and the built environment. To address the complexity of architectural tourism throughout the book, this topic is subject of a controversial discussion and approached with a contextual and interdisciplinary view. Routledge Handbook of Tourism Cities Alastair M. Morrison, J. Andres Coca-Stefaniak, 2020-08-27 The Routledge Handbook of Tourism Cities presents an up to date critical and comprehensive overview of established and emerging themes in urban tourism and tourist cities. Offering socio cultural perspectives and multidisciplinary insights from leading scholars, the book explores contemporary issues, challenges and trends. Organised into four parts, the handbook begins with an introductory section that explores contemporary issues, challenges and trends that tourism cities face today. A range of topics are explored including sustainable urban tourism, overtourism and urbanisation, the impact of terrorism, visitor host interactions as well as reflections on present and future challenges for tourism cities. In Part II the marketing, branding and markets for tourism cities are considered, exploring topics such as destination marketing and branding, business travellers and exhibition hosting. This section combines academic scholarship with real life practice and case studies from cities. Part III discusses product and technology developments for tourism cities, examining their supply and impact on different travellers from open air markets to creative waterfronts, from social media to smart cities. The final Part offers examples of how urban tourism is developing in different parts of the world and how worldwide tourism cities are adapting to the challenges ahead. It also explores emerging forms of specialist tourism including geology and ecology based tourism, socialist heritage and post communist destination tourism. This handbook fills a notable gap by offering a critical and detailed understanding of the diverse elements of the tourist experience today. It contains useful suggestions for practitioners as well as examples for theoretical frameworks to students in the fields of urban tourism and tourism cities. The handbook will be of interest to scholars and students working in urban tourism, heritage studies, human geography, urban studies and urban planning, sociology, psychology and business studies. **Tourism, Travel, and Hospitality in a Smart and Sustainable World** Vicky Katsoni, 2023-05-26 This book features the second volume of the proceedings of the 9th International Conference of the International Association of Cultural and Digital Tourism (IACuDiT) held at the Syros Island in Greece in September 2022. The Postcolonial Condition of Architecture in Asia Francis Chia-Hui Lin, 2022-02-16 This book provides a bidirectional investigation of Asia's spatiotemporality by asking how Asia is located and how localities are Asianized Historical and theoretical inquiries into architecture and urbanism in order to trace a notional common divisor are integrated with readings of this Asian imagery Such a common divisor is conditioned to Asia's phenomenal postcolonial subjectivation and showcases Asia's unique character This book contends that the postcolonial condition of architecture in Asia suggests a potential and critical bridge to better understanding of the region Theoretically display ness is a strategic and allegoric carrier that is in the focus of this book in order to emphasize the quality of display in a broader sense of time and space Asia's architectural and urban spectacle thus is meaningfully magnified and intensified with this notion of display ness to ground the cohesive abstraction among ideological discourse production innovative theorizations and empirical phenomena in contemporary scholarship
