Architecture As Philosophy The Works Of Imre Makovecz:

Architecture as Philosophy, 2005 At the start of this book Imre Makovecz gently criticises the commentators who first brought his work to the West He is grateful to them of course but he claims they only half understood simplifying and misinterpreting They presented him as a heroic rebel against the communist system rather than seeing his battle against a larger enemy that we all still face this he calls impersonal intelligence When he remarks that architecture is not regarded as an art in Hungary but as a service and that it has no place in the Ministry of Culture we find it all too familiar It is perhaps understandable that someone so concerned with cultural memory especially long repressed folk memories should arise in much oppressed Hungary which was fought over for millennia even before the advent of the Soviet Empire but the same cultural amnesia is occurring throughout the world exhibited in increasing rootlessness and placelessness Perhaps the most misleading reading of all has been Makovecz the wild man or primitive but this book shows him to be a highly articulate architectural philosopher and intellectual conversant from the start with a wide range of international sources There is much more to the work than the expressive image we first encounter It warmly embraces place and community and quite aside from its ecological dimension there is a concern with the building process and the participation of craftsmen that would have warmed William Morris heart Most bold and most intriguing is Makovecz's claim to be tapping into ancient and universal folk memories that are lodged in hand made patterns gestures and even dance Over the last century we have had to revise our sense of civilisation for cities and writing are but five thousand years old yet our forebears tens of thousand years ago could scarcely have been less intelligent and communicative than ourselves

Botz-Bornstein,2017-06-01 The organic is by now a venerable concept within aesthetics architecture and art history but what might such a term mean within the spatialities and temporalities of film By way of an answer this concise and innovative study locates organicity in the work of B la Tarr the renowned Hungarian filmmaker and pioneer of the slow cinema movement Through a wholly original analysis of the long take and other signature features of Tarr s work author Thorsten Botz Bornstein establishes compelling links between the seemingly remote spheres of film and architecture revealing shared organic principles that emphasize the transcendence of boundaries *RIBA Journal* ,2006 **Bibliographie sakrale**
