Arrival City How The Largest Migration In History Is Reshaping Our World:

Arrival City Doug Saunders, 2011-03-22 Look around the largest migration in human history is under way For the first time ever more people are living in cities than in rural areas Between 2007 and 2050 the world's cities will have absorbed 3.1 billion people Urbanization is the mass movement that will change our world during the twenty first century and the arrival city is where it is taking place The arrival city exists on the outskirts of the metropolis in the slums or in the suburbs the American version is New York's Lower East Side of a century ago or today's Herndon County Virginia These are the places where newcomers try to establish new lives and to integrate themselves socially and economically Their goal is to build communities to save and invest and hopefully move out making room for the next wave of migrants For some success is years away for others it will never come at all As vibrant places of exchange arrival cities have long been indicators of social health Whether it's Paris in 1789 or Tehran in 1978 whenever migrant populations are systematically ignored we should expect violence and extremism But as the award winning journalist Doug Saunders demonstrates when we make proper investments in our arrival cities through transportation education security and citizenship a prosperous middle class develops Saunders takes us on a tour of these vital centers from Maryland to Shenzhen from the favelas of Rio to the shantytowns of Mumbai from Los Angeles to Nairobi He uncovers the stories both inspiring and heartbreaking of the people who live there and he shows us how the life or death of our arrival cities will determine the shape of our future Biocitizenship Kelly E.

Happe, Jenell Johnson, Marina Levina, 2018-08-21 *Biocitizenship The Politics of Bodies Governance and Power* is a critical study of the relationship between the concept of citizenship and the body **Wake Up, This Is Joburg** Tanya Zack, Mark Lewis, 2022-09-19 A single image taken from a high rise building in inner city Johannesburg uncovers layers of history from its premise and promise of gold to its current improvisations It reveals the city as carcass and as crucible where informal agents and processes spearhead its rapid reshaping and transformation In *Wake Up This Is Joburg* writer Tanya Zack and photographer Mark Lewis offer a stunning portrait of Johannesburg and personal stories of some of the city's ordinary odd and outrageous residents Their photos and essays take readers into meat markets where butchers chop cow heads the eclectic home of an outsider artist that features turrets and full of manikins long abandoned gold pits beneath the city where people continue to mine informally and lively markets taxi depots and residential high rises Sharing people's private and work lives and the extraordinary spaces of the metropolis Zack and Lewis show that Johannesburg's urban transformation occurs not in a series of dramatic wide scale changes but in the everyday lives actions and dreams of individuals

Rethinking Life at the Margins Michele Lancione, 2016-04-20 Experimenting with new ways of looking at the contexts subjects processes and multiple political stances that make up life at the margins this book provides a novel source for a critical rethinking of marginalisation Drawing on post colonialism and critical assemblage thinking the rich ethnographic works presented in the book trace the assemblage of marginality in multiple case studies encompassing the Global North and

South These works are united by the approach developed in the book characterised by the refusal of a priori definitions and by a post human and grounded take on the assemblage of life The result is a nuanced attention to the potential expressed by everyday articulations and a commitment to produce a processual vitalist and non normative cultural politics of the margins The reader will find in this book unique challenges to accepted and authoritative thinking and provides new insights into researching life at the margins

Transformation Processes in Europe and Beyond Florian Weber,Olaf Kühne,Julia Dittel,2024-07-05 Europe and the world in all their diversity and complexity have always been and continue to be in a state of change Recent geo political environmental social and economic developments demonstrate a world in constant flux These ever changing framework conditions require corresponding transformations in many different structures This anthology takes these observations as a starting point to illuminate theoretical perspectives methodological approaches and empirical insights related to recent transformation processes in Europe and beyond with a special focus in this respect on the USA In view of their comprehensive nature transformation processes cannot be analysed from a single perspective a uniform approach or theory would fail to address their complexity and contingency In this sense horizontal geographies serves as our theoretical framework The concept refers to comprehensive synthesizing regional analyses which collect structure and reflect on knowledge with diverse spatial social and cultural contexts The interdisciplinary and international authorship does justice to the idea of horizontal multi perspective geographies and considers a wide range of transformation processes in Europe and beyond

Upgrading Informal Settlements in South Africa Liza Rose Cirolia,Tristan Görgens,Mirjan van Donk,Warren Smit,Scott Drimie,2017-11-10 More than 1 2 million households in South Africa live in informal settlements without access to adequate shelter services or secure tenure There has been a gradual shift to upgrading these informal settlements in recent years and there have been some innovative experiments Upgrading Informal Settlements in South Africa a partnership based approach examines the successes and challenges of informal settlement upgrading initiatives in South Africa and contextualises these experiences within global debates about informal settlement upgrading and urban transformation The book discusses The South African informal settlement upgrading agenda from local national and international perspectives South African city experiences with informal housing and upgrading The role of partnerships actors and capabilities in pursuing an incremental upgrading agenda Tools instruments and methodologies for incremental upgrading Implications of the upgrading agenda for the transformation of cities The book has been written and edited by a wide range of practitioners and researchers from government NGOs the private sector and academia It covers theory and practice and represents a vast accumulated body of housing experience in South Africa

Waste and the City Colin McFarlane,2023-08-15 Sanitation is fundamental to urban public life and health We need Sanitation for All In an age of pandemics the relationship between the health of the city and good sanitation has never been more important Waste in the City is a call to action on one of modern urban life s most neglected issues sanitation infrastructure The Covid 19 pandemic

has laid bare the devastating consequences of unequal access to sanitation in cities across the globe At this critical moment in global public health Colin McFarlane makes the urgent case for Sanitation for All The book outlines the worldwide sanitation crisis and offers a vision for a renewed equitable investment in sanitation that democratises and socialises the modern city Adopting Henri Lefebvre's concept of the right to the city it uses the notion of citylife to reframe the discourse on sanitation from a narrowly defined policy discussion to a question of democratic right to public life and health In doing so the book shows that sanitation is an urbanizing force whose importance extends beyond hygiene to the very foundation of urban social life

Extreme Cities Ashley Dawson, 2017-10-31 How will climate change affect our lives Where will its impacts be most deeply felt Are we doing enough to protect ourselves from the coming chaos In *Extreme Cities* Ashley Dawson argues that cities are ground zero for climate change contributing the lion's share of carbon to the atmosphere while also lying on the frontlines of rising sea levels Today the majority of the world's megacities are located in coastal zones yet few of them are adequately prepared for the floods that will increasingly menace their shores Instead most continue to develop luxury waterfront condos for the elite and industrial facilities for corporations These not only intensify carbon emissions but also place coastal residents at greater risk when water levels rise In *Extreme Cities* Dawson offers an alarming portrait of the future of our cities describing the efforts of Staten Island New York and Shishmareff Alaska residents to relocate Holland's models for defending against the seas and the development of New York City before and after Hurricane Sandy Our best hope lies not with fortified sea walls he argues Rather it lies with urban movements already fighting to remake our cities in a more just and equitable way As much a harrowing study as a call to arms *Extreme Cities* is a necessary read for anyone concerned with the threat of global warming and of the cities of the world *The Wiley-Blackwell Encyclopedia of Urban and Regional Studies* Anthony M. Orum, 2019-04-15 Provides comprehensive coverage of major topics in urban and regional studies Under the guidance of Editor in Chief Anthony Orum this definitive reference work covers central and emergent topics in the field through an examination of urban and regional conditions and variation across the world It also provides authoritative entries on the main conceptual tools used by anthropologists sociologists geographers and political scientists in the study of cities and regions Among such concepts are those of place and space geographical regions the nature of power and politics in cities urban culture and many others The Wiley Blackwell Encyclopedia of Urban and Regional Studies captures the character of complex urban and regional dynamics across the globe including timely entries on Latin America Africa India and China At the same time it contains illuminating entries on some of the current concepts that seek to grasp the essence of the global world today such as those of Friedmann and Sassen on global cities It also includes discussions of recent economic writings on cities and regions such as those of Richard Florida Comprised of over 450 entries on the most important topics and from a range of theoretical perspectives Features authoritative entries on topics ranging from gender and the city to biographical profiles of figures like Frank Lloyd Wright Takes a global perspective

with entries providing coverage of Latin America and Africa India and China and the US and Europe Includes biographies of central figures in urban and regional studies such as Doreen Massey Peter Hall Neil Smith and Henri Lefebvre The Wiley Blackwell Encyclopedia of Urban and Regional Studies is an indispensable reference for students and researchers in urban and regional studies urban sociology urban geography and urban anthropology *The City on Display* Joel Robinson,2022-08-19 The City on Display Architecture Festivals and the Urban Commons reflects on the biennials triennials and other festivals of architecture and design that have been held over the last two decades as they expand and transform in response to the exigencies of planetary urbanisation Joel Robinson examines the development of these large scale international and perennial exhibitions as they address such challenges as urban regeneration heritage preservation climate change and the migration crisis Homing in on examples of festivals in Venice Rotterdam Oslo Tallinn Sharjah Seoul Shenzhen and Hong Kong the author describes how they alter the public spaces that host them either through civic boosterism and gentrification on the one hand or through a reassertion of the urban commons and the right to the city on the other hand He attempts to thematise the architecture festival s relationship with the city and interrogate its potential as a forum for global debate about the emergencies of the urban condition This book will be beneficial for students and academics of architecture and urbanism and especially those who have an interest in how the city gets exhibited at such festivals and even reimaged as something other than it currently is
