Spirit and Art Van James, 2002 Stumbling through life gazing at the stars we can miss the greatest treasure beneath our feet For the ordinary faculties of our soul how we think how we feel how we act are the rough and fallen forms of our highest spiritual capacities This book shows how six of these common abilities thinking feeling doing loving opening thanking can be intensified infinitely We already think we can learn to think more deeply more livingly We already feel we can learn to train our feeling life away from ourselves so that we feel the world in its richness We already thank we can learn a depth of gratitude that makes life and love intensely real These exercises are simple but demanding By strengthening our capacity to pay attention they allow us to say the right word and have the fresh thought just when we need to They gradually lead us out of the mire of distraction and confusion and allow us to practice what we need most continual presence of mind *Hegel's Phenomenology of Spirit* Richard Dien Winfield, 2013-06-27 Hegel's *Phenomenology of Spirit* A Critical Rethinking in Seventeen Lectures provides a clear and philosophically engaging investigation of Hegel's first masterpiece perhaps the most revolutionary work of modern philosophy The book guides the reader on an intellectual adventure that takes up Hegel's revolutionary strategy of paving the way for doing philosophy without presuppositions by first engaging in a phenomenological investigation of knowing as it appears That preliminary investigation observes how the prevailing view of knowing that condemns cognition to operating with presuppositions proves unable to justify its own knowledge claims and ends up undermining the distinction between knowing and its object on which that view depends Unlike other studies of Hegel's *Phenomenology of Spirit* the work rethinks the entire argument with sustained attention to the project that gives the work its revolutionary significance Free of unnecessary jargon and always focusing on clearly unraveling the argument in its entirety Hegel's *Phenomenology of Spirit* A Critical Rethinking in Seventeen Lectures will be indispensable to undergraduate and graduate students of philosophy Hegel scholars and anyone interested in tackling the radical project of doing philosophy without foundations Proceedings of The 7th International Conference on Contemporary Education, Social Sciences and

Humanities (Philosophy of Being Human as the Core of Interdisciplinary Research) (ICCESSH 2022) Olga Chistyakova, Iana Roumbal, 2023-02-10 This is an open access book The aim of the Conference is to provide a shared platform for academics scholars PhD students and graduate students with different cultural backgrounds to present and discuss research developments and innovations in the fields of contemporary education social sciences and humanities are referred with the understanding of the Human being Papers concerning education philosophy philosophical anthropology sociology theory and history of culture epistemology religions ethics are strongly related with analyzing of the Human being will be considered Interdisciplinary approach and comparative perspective are encouraged The Origins of Modern Critical Thought: German Aesthetic and Literary Criticism from Lessing to Hegel David Simpson, 1988-10-28 An exceptional resource this 1988 book provides a comprehensive anthology in English of the major texts of German literary and aesthetic theory between Lessing and Hegel The texts are crucial to an understanding not only of the Romantic period itself but also of the foundational arguments of literary theory **The Philosophy of Enchantment** R. G. Collingwood, 2005 This is the long awaited publication of a set of writings by the British philosopher historian and archaeologist R G Collingwood on critical anthropological and cultural themes only hinted at in his previously available work At the centre of the book are six chapters of a study of folktale and magic composed by Collingwood in the mid 1930s and intended for development into a book Here Collingwood applies the principles of his philosophy of history to problems in the long term evolution of human society and culture This is preceded in Part I by a range of contextualizing material on such topics as the relations between music and poetry the nature of language the value of Jane Austen's novels the philosophy of art and the relations between aesthetic theory and artistic practice Part III of the volume consists of two essays one on the relationship between art and mechanized civilization and the second written in 1931 on the collapse of human values and civilization leading up to the catastrophe of armed conflict These offer a devastating analysis of the consequences that attend the desertion of liberal principles indeed of all politics as such in the ultimate self annihilation of military conquest The volume opens with three substantial introductory essays by the editors authorities in the fields of critical and literary history social and cultural anthropology and the philosophy of history and the history of ideas they provide their explanatory and contextual notes to guide the reader through the texts The Philosophy of Enchantment brings hitherto unrecognized areas of Collingwood's achievement to light and demonstrates the broad range of Collingwood's intellectual engagements their integration and their relevance to current areas of debate in the fields of philosophy cultural studies social and literary history and anthropology **Third Way**, 1990-09 Monthly current affairs magazine from a Christian perspective with a focus on politics society economics and culture
