Art For London Transport 2015 Calendar:

The Creative Underground Paul Clements, 2016-09-13 Paul Clements champions the creative underground and expressions of difference through visionary avant garde and resistant ideas This is represented by an admixture of utopian literature manifestos and lifestyles which challenge normality and attempt to reinvent society as practiced for example by radicals in bohemian enclaves or youth subcultures He showcases a range of art and participatory cultural practices that are examined sociopolitically and historically employing key theoretical ideas which highlight their contribution to aesthetic thinking political ideology and public discourse A reevaluation of the arts and progressive modernism can reinvigorate culture through active leisure and post work possibilities beyond materialism and its constraints thereby presenting alternatives to established understandings and everyday cultural processes The book teases out the difficult relationship between the individual culture and society especially in relation to autonomy and marginality while arguing that the creative underground is crucial for a better world as it offers enchantment vitality and hope

Tunnels and Underground Cities. Engineering and Innovation Meet Archaeology, Architecture and Art Daniele Peila, Giulia Viggiani, Tarcisio Celestino, 2019-04-17 Tunnels and Underground Cities Engineering and Innovation meet Archaeology Architecture and Art contains the contributions presented at the World Tunnel Congress 2019 Naples Italy 3-9 May 2019 The use of underground space is continuing to grow due to global urbanization public demand for efficient transportation and energy saving production and distribution The growing need for space at ground level along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives demand greater and better use of the underground space to ensure that it supports sustainable resilient and more liveable cities This vision was the source of inspiration for the design of the logos of both the International ITA and Italian SIG Tunnelling Association By placing key infrastructures underground the black circle in the logos it will be possible to preserve and enhance the quality of the space at ground level the green line In order to consider and value underground space usage together with human and social needs engineers architects and artists will have to learn to collaborate and develop an interdisciplinary design approach that addresses functionality safety aesthetics and quality of life and adaptability to future and varied functions The 700 contributions cover a wide range of topics from more traditional subjects connected to technical challenges of design and construction of underground works with emphasis on innovation in tunneling engineering to less conventional and archetypically Italian themes such as archaeology architecture and art The book has the following main themes Archaeology Architecture and Art in underground construction Environment sustainability in underground construction Geological and geotechnical knowledge and requirements for project implementation Ground improvement in underground constructions Innovation in underground engineering materials and equipment Long and deep tunnels Public communication and awareness Risk management contracts and financial aspects Safety in underground construction Strategic use of

K. Lam,2017-02-17 The growing mobility needs of travellers have led to the development of increasingly complex and integrated multi modal transit networks Hence transport agencies and transit operators are now more urgently required to assist in the challenging task of effectively and efficiently planning managing and governing transit networks A pre condition for the development of an effective intelligent multi modal transit system is the integration of information and communication technology ICT tools that will support the needs of transit operators and travellers To achieve this reliable real time simulation and short term forecasting of passenger demand and service network

conditions are required to provide both real time traveller information and successfully synchronise transit service planning and operations control Modelling Intelligent Multi Modal Transit Systems introduces the current trends in this newly emerging area Recent developments in information technology and telematics have enabled a large amount of data to become available thus further attracting transport researchers to set up new models outside the context of the traditional data driven approach The alternative demand supply interaction or network assignment modelling approach has improved greatly in recent years and has a crucial role to play in this new context

Going Underground Lara Langer Cohen, 2022-12-16 First popularized by newspaper coverage of the Underground Railroad in the 1840s the underground serves as a metaphor for subversive activity that remains central to our political vocabulary In *Going Underground* Lara Langer Cohen excavates the long history of this now familiar idea while seeking out versions of the underground that were left behind along the way Outlining how the underground's figurative sense first took shape through the associations of literal subterranean spaces with racialized Blackness she examines a vibrant world of nineteenth century US subterranean literature that includes Black radical manifestos anarchist periodicals sensationalist exposés of the urban underworld manuals for sex magic and the initiation rites of secret societies Cohen finds that the undergrounds in this literature offer sites of political possibility that exceed the familiar framework of resistance suggesting that nineteenth century undergrounds can inspire new modes of world making and world breaking for a time when this world feels increasingly untenable
