King, 2021-09-22 Art Therapy Trauma and Neuroscience combines theory research and practice with traumatized populations in a neuroscience framework The classic edition includes a new preface from the author discussing advances in the field Recognizing the importance of a neuroscience and trauma informed approach to art therapy practice research and education some of the most renowned figures in art therapy and trauma use translational and integrative neuroscience to provide theoretical and applied techniques for use in clinical practice Graduate students therapists and educators will come away from this book with a refined understanding of brain based interventions in a dynamic yet accessible format

Arts in Health Daisy Fancourt, 2017-06-23 Over the past few decades the use of the arts in health has blossomed What for many centuries was seen as a fringe activity is now being recognised as a field that has enormous potential for impacting positively on both individuals and societies However despite this surge in interest and activity there is still limited support available for people working in the field Although the number of practical training courses for artists is growing and more universities are establishing research groups most training activity occurs in either practice or research there are relatively few opportunities to gain parallel experience in both Arts in Health Designing and Researching Interventions provides a complete overview of how to go about undertaking research and practice in the field of arts in health It starts by exploring the context for arts in health interventions including the history of the use of arts in health and the theoretical and political developments that have laid the foundations for its flourishing It also considers what arts in health encompasses and the range of disciplines involved Part II examines how to design an arts in health intervention develop partnerships and find funding and considers the sensitivities around working in healthcare Part III considers the value of research for the field of arts in health and how to design and undertake a research project Finally part IV provides a fact file of arts in health research and practice showing how the arts can be applied and the benefits they can bring across a range of medical disciplines The book will be valuable for researchers practitioners healthcare professionals and those interested in learning more about the field

Psychodynamic Approaches to the Experience of Dementia Sandra Evans, Jane Garner, Rachel Darnley Smith, 2019-12-05 Psychodynamic Approaches to the Experience of Dementia Perspectives from Observation Theory and Practice demonstrates the impact of healthcare approaches that take into account not only the practical needs but also the emotional experience of the patient their partners families and friends lay carers and professional staff Currently there is no cure for dementia but the psychosocial and therapeutic approaches described in this volume have appeared to help people both patients and carers feel more contained and less lonely and isolated Psychoanalytic theory provides a disciplined way of thinking about the internal world of an individual and their relationships

Each author provides their own commentary on the personal and interpersonal effects of dementia endeavouring to understand behaviours and emotions which may otherwise seem incomprehensible The subject is approached from a psychodynamic perspective considering the unconscious previous and current experiences and relationships including those between patients and staff Psychodynamic Approaches to the Experience of Dementia illustrates the practical and theoretical thinking of clinicians from a wide range of disciplines who are engaged in the care of people in late life with a diagnosis of dementia It will be essential reading for mental health and health professionals in practice and training in the field of dementia
