Rutgers Computer & Technology Law Journal, 1998 Competition Law and Development D. Daniel Sokol, Thomas K. Cheng, Ioannis Lianos, 2013-09-11 The vast majority of the countries in the world are developing countries there are only thirty four OECD Organisation for Economic Co operation and Development countries and yet there is a serious dearth of attention to developing countries in the international and comparative law scholarship which has been preoccupied with the United States and the European Union *Competition Law and Development* investigates whether or not the competition law and policy transplanted from Europe and the United States can be successfully implemented in the developing world or whether the developing world experience suggests a need for a different analytical framework The political and economic environment of developing countries often differs significantly from that of developed countries in ways that may have serious implications for competition law enforcement The need to devote greater attention to developing countries is also justified by the changing global economic reality in which developing countries especially China India and Brazil have emerged as economic powerhouses Together with Russia the so called BRIC countries have accounted for thirty percent of global economic growth since the term was coined in 2001 In this sense developing countries deserve more

attention not because of any justifiable differences from developed countries in competition law enforcement either in theoretical or practical terms but because of their sheer economic heft This book the second in the Global Competition Law and Economics series provides a number of viewpoints of what competition law and policy mean both in theory and practice in a development context

Competition Law Richard Whish, David Bailey, 2012-01-12 The authors describes the potential scope and application of the various legal provisions which regulate competition in the UK This book also examines the results of the convergence of UK and EC law with regard to competition in business

European Yearbook of International Economic Law 2013 Christoph Herrmann, Markus Krajewski, Jörg Philipp Terhechte, 2013-04-02 Part one of Volume 4 2013 of the European Yearbook of International Economic Law offers a special focus on recent developments in international competition policy and law International competition law has only begun to emerge as a distinct subfield of international economic law in recent years even though international agreements on competition co operation date back to the 1970s Competition law became a prominent subject of political and academic debates in the late 1990s when competition and trade were discussed as one of the Singapore issues in the WTO Today international competition law is a complex and multi layered system of rules and principles encompassing not only the external application of domestic competition law and traditional bilateral co operation agreements but also competition provisions in regional trade agreements and non binding guidelines and standards Furthermore the relevance of competition law for developing countries and the relationship between competition law and public services are the subject of heated debates The contributions to this volume reflect the growing diversity of the issues and elements of international competition law Part two presents analytical reports on the developments of the regional integration processes in North America Central Africa and Southeast Asia as well as on the treaty practice of the European Union Part three covers the legal and political developments in major international organizations that deal with international economic law namely the IMF WCO WTO WIPO ICSID and UNCTAD Lastly part four offers book reviews of recent works in the field of international economic law

,2014 **Media Ownership and Concentration in America** Eli M. Noam,2009-10-19 The concentration of private power over media has been the subject of intense public debate around the world Critics have long feared waves of mergers creating a handful of large media firms that would hold sway over public opinion and endanger democracy and innovation But others believe with equal fervor that the Internet and deregulation have opened the media landscape significantly How concentrated has the American information sector really become What are the facts about American media ownership In this contentious environment Eli Noam provides a comprehensive and balanced survey of media concentration with a methodical scientific approach He assembles a wealth of data from the last 25 years about mass media such as radio television film music and print publishing as well as the Internet telecommunications and media related information technology After examining 100 separate media and network industries in detail Noam provides a powerful summary and analysis of concentration trends across industries and major media sectors He also looks at local media power vertical concentration and the changing nature of media ownership through financial institutions and private equity The results reveal a reality much more complex than the one painted by advocates on either side of the debate They show a dynamic system that fluctuates around long term concentration trends driven by changing economics and technology Media Ownership and Concentration in America will be essential reading and a trove of information for scholars and students in media telecommunications IT economics and the history of business as well as media industry professionals business researchers and policy makers around the world Critics and defenders of media trends alike will find much that confirms and refutes their world view But the next round of their debate will be shaped by the facts presented in this book
